

Content

1. Application of Sensitivity Analysis to Specific Problems in Fire Protection Engineering to Identify the Most Critical Parameters and to Reduce Dimensionality <i>Cornelius Albrecht, Matthias Siemon, Dietmar Hosser</i>	13
2. Probabilistic Assessment of External Explosion Pressure Waves <i>Heinz Peter Berg, Jan Hauschild</i>	27
3. The Probability of Collision During Vessel Overtaking <i>Zbigniew Burciu, Piotr Lizakowski</i>	41
4. Quantifying the Filtering Effect of Conformity Inspection on the Reliability of Reinforced Concrete Structures <i>Robby Caspeele, Miroslav Sykora, Luc Taerwe</i>	47
5. Assessment of the Reduction of the Safety Level of Concrete Slabs During Fire <i>Ruben Van Coile, Robby Caspeele, Emmanuel Annerel, Luc Taerwe</i>	61
6. Deriving a Beta-Like Distribution for Reliability Problems <i>Noel van Erp, Pieter van Gelder</i>	73
7. The Applying of Risk to Assessment of Navigational Safety on Port Water Areas <i>Wiesław Galor</i>	79
8. Modeling the Risk and Uncertainties for Assessment of Ship Survivability <i>Miroslaw Gerigk</i>	91
9. Analysis of Vessels Collision "m/v Ziemia Łódzka" and "m/v Vertigo" with Fullmission Bridge Simulator <i>Rafał Gralak, Wiesław Juskiewicz</i>	101
10. The Incident Based System of Navigational Safety Management on Coastal Areas <i>Lucjan Gućma, Krzysztof Marcjan</i>	115
11. Ships' Traffic Analysis on Świnoujście Approach Fairway by Statistical Methods <i>Lucjan Gućma, Agnieszka Puszcz</i>	129
12. Fault tolerant software in high speed data acquisition of vessel inertial position. <i>Maciej Gućma</i>	143
13. Markov Approach to the Ship's Navigational Safety in Terms of Decision-making <i>Sambor Guze, Leszek Smolarek</i>	153
14. Specific Assessment of Conformity Risks vs. Application of a General Procedure <i>Wilfried Hinrichs</i>	165
15. Probabilistic Calculation of Differential Settlement due to Tunnelling <i>Maximilian Huber, Michael A. Hicks, Pieter A. Vermeer, Christian Moormann</i> ..	175

16. Monitoring Systems for the Bridge Railway Interaction <i>Saeed Karimi, Thomas Zimmerman, Alfred Strauss</i>	189
17. Verification of the Convolution Method on the Szczecin-Świnoujście Fairway Section With the Speed Limit <i>Lech Kasyk</i>	199
18. Stochastic Evaluation of Active Corroding Areas in Concrete Structures <i>Sylvia Kessler, Maximilian Huber, Daniel Straub, Christoph Gehlen, Christian Moormann</i>	209
19. An Approach of Stochastic Expansions for the Reliability Assessment of Complex Structures <i>Athanasios Kolios, Adrien Quinio, Antonios Antoniadis, Feargal Brennan</i>	223
20. Safety Optimization of a Ferry Technical System <i>Krzysztof Kołowrocki, Joanna Soszyńska</i>	233
21. The Probability of Coast Pollution – Accident Simulation in the PISCES II Simulator <i>Kinga Łazuga, Wiesław Juszkiewicz</i>	247
22. Quantification of the Durability of Concrete Bridges – a Probabilistic Modelling of Environmental and Functional Interactions <i>Tabea Neumann, Michael Vogel, Herald S. Müller</i>	261
23. Probabilistic method of ships passing distance assessment in encounter situation <i>Zbigniew Pietrzykowski</i>	275
24. Debris Flow Impact Uncertainty Modeling with Grey Numbers <i>Dirk Proske</i>	285
25. Comparison of Selected Models for the Assessment of Collision Probability <i>Marcin Przywarty</i>	297
26. Results from the Beznau Seismic PSA <i>Martin Richner, Sener Tinic, Dirk Proske, Mayasandra Ravindra, Robert Campbell, Farzin Beigi, Alejandro Asfura</i>	307
27. Example Results of Probabilistic Model of Under-keel Clearance Application in Safety Evaluation and Ports' Depth Design <i>Marta Schoeneich</i>	321
28. Analysis and Reliability Assessment of Chloride Deteriorated Pre-stressed Concrete Structures – Part II <i>Alfred Strauss, Břetislav Teplý, Drahomír Novák, Radomír Pukl, Konrad Bergmeister, Roman Wendner</i>	331
29. A Model for Calculating the Contingency Budget in a Portfolio of Projects Using a Bayesian Approach <i>Ali Touran, Payam Bakhshi</i>	343
30. Approach in Risk Assessment for LNG Terminals <i>Peter Vidmar, Stojan Petelin, Marko Perkovič</i>	355
