

## CONTENTS

### **Andrzej Felski, Marta Gortad**

The significance of an antenna for jamming resistance of a GPS receiver ..... 5

### **Maria Gatz, Andrzej Łuksza, Ryszard Studański**

Data processing methodology for experimental modeling of ocean waves ..... 17

### **Andrzej Grządziela**

Propulsion systems of motor-sail yachts — problems of diagnosing ..... 33

### **Wojciech Jurczak**

Impact resistance of aluminium ship structures ..... 45

### **Tomasz Kniaziewicz**

Modeling of emissions and dispersion of harmful compounds from marine main propulsion diesel engines of vessels navigating in specified water basins ..... 55

### **Adam Polak, Grzegorz Grzeczka, Paweł Swoboda, Piotr Bakiera**

Aspects of safe operation of lithium-based batteries in marine applications ..... 75

### **Tomasz Sobczyński**

The principles of classified information protection handled in communication and information systems within the realisation of European Defence Agency research projects ..... 87

### **Arkadiusz Woźniak**

Evaluation of the impact of breathing air contamination on safe performance of hyperbaric exposure ..... 101
