

# TABLE OF CONTENTS

Introduction .....	11
<b>THE PLACE AND ROLE OF AN IS IN BUSINESSES</b>	
1.1. Introduction.....	15
1.2. Basic concepts: data, information, knowledge, system .....	17
1.3. Overview of the definitions of information.....	23
1.3.1. Quantitative approach.....	27
1.3.2. Qualitative approach.....	41
1.4. The information system as part of an organisational system...	46
1.4.1. Information and its importance in the organisation....	46
1.4.2. The definition of an information system .....	50
1.4.3. The information system as a complex system .....	55
1.4.4. A typology of management information systems .....	60
1.5. Information technology .....	63
1.5.1. Technological progress and organisational progress	63
1.5.2. The role of information technology in modern business organisations .....	64
1.5.3. The concept of the waves of innovation.....	67
1.5.4. The strategic significance of IT .....	68
1.5.5. IT productivity paradox .....	71
1.6. IT governance.....	72
1.6.1. The conditions necessitating the creation of a comprehensive IT governance model.....	72
1.6.2. The origins of the concept .....	74
1.6.3. The definition of IT governance .....	76

1.6.4. Systemic dimension of IT governance .....78  
 1.6.5. IT governance structure.....79

**ANALYSIS AND DESIGN OF INFORMATION SYSTEMS**

2.1. Soft systems methodology .....87  
 2.2. Overview of the system life cycle models ..... 94  
     2.2.1. The project lie cycle..... 96  
     2.2.2. The system life cycle..... 101  
 2.3. Description of selected methodologies, methods and tools ... 102  
     2.3.1. The evolution of information systems analysis  
             and design methods ..... 102  
     2.3.2. Structural analysis and design methodologies ..... 107  
     2.3.3. Object-oriented analysis and design  
             methodologies ..... 122  
 2.4. Selected project management topics ..... 148  
     2.4.1. Project management methodologies ..... 148  
     2.4.2. Change management ..... 150  
     2.4.3. IT tools supporting project management ..... 151  
 2.5. Modern trends in MIS design..... 151  
     2.5.1. Why the need for UBMSS class systems? ..... 154  
     2.5.2. How to achieve automatic understanding  
             in management support systems? ..... 156  
     2.5.3. UBMSS system construction ..... 159  
     2.5.4. Summary and conclusions ..... 161

**ENTERPRISE SYSTEMS**

3.1. Process-oriented organisation..... 165  
 3.2. The concept of an enterprise system..... 167  
     3.2.1. Review of the definition of an enterprise system ..... 167

3.2.2.	Integration of the company as a result of using an enterprise system .....	168
3.2.3.	Key features of enterprise systems and conditions for their application in an enterprise.....	169
3.2.4.	The architecture and the basic modules of an enterprise system .....	172
3.2.5.	Selected modules of the enterprise system using the example of SAP R/3 .....	173
<b>3.3.</b>	<b>The basic classes of enterprise systems and their evolution..</b>	<b>176</b>
3.3.1.	Inventory control systems .....	176
3.3.2.	MRP systems.....	177
3.3.3.	The closed-loop MRP system.....	177
3.3.4.	MRP II system .....	178
3.3.5.	ERP systems .....	178
3.3.6.	The concept of ERP II systems .....	179
3.3.7.	Trends and directions in the development of enterprise systems.....	180
<b>3.4.</b>	<b>Success in enterprise system adoption .....</b>	<b>180</b>
3.4.1.	The concept and the evolution of an information system success .....	180
3.4.2.	Multidimensional IS success model by DeLone and McLean .....	181
3.4.3.	DeLone and McLean model in the area of enterprise systems.....	184
3.4.4.	User satisfaction as a general measure of the success of enterprise system implementation .....	186
3.4.5.	The importance of success depending on the phase of the life cycle of the enterprise system ..	187
3.4.6.	The concept of a relative success .....	189
<b>3.5.</b>	<b>Motivations for enterprise system adoptions .....</b>	<b>189</b>
3.5.1.	Reasons for adopting the enterprise system depending on the size of the company .....	189

3.5.2.	Reasons for migration to the new system version ....	191
3.5.3.	Relationships between the reasons for implementation of enterprise systems .....	192
3.5.4.	Motivations for enterprise system implementations in the context of the effects of implementation .....	193
3.5.5.	Benefits of the implementation, depending on the business or technological approach to the implementation .....	194
3.5.6.	Motivations for Polish enterprises to implement enterprise systems.....	196
3.5.7.	Motivations of companies in emerging and developed economies.....	198
<b>3.6.</b>	<b>Benefits of the enterprise system in an enterprise.....</b>	<b>200</b>
3.6.1.	Benefits achieved by companies in developed economies .....	200
3.6.2.	The occurrence of the benefits over time .....	201
3.6.3.	Benefits dimensions.....	202
3.6.4.	Benefits achieved by Polish enterprises .....	204
<b>3.7.</b>	<b>Determinants of the implementation process .....</b>	<b>206</b>
3.7.1.	Implementation participants.....	206
3.7.2.	Problems encountered during the implementation of enterprise systems.....	207
3.7.3.	Barriers and risk factors in the implementation of enterprise systems.....	210
3.7.4.	Success factors in the implementation of enterprise systems.....	212
<b>3.8.</b>	<b>The evaluation of the implementation of an enterprise system .....</b>	<b>218</b>
3.8.1.	The need for multidimensional and multi-stage evaluation of IT projects.....	218
3.8.2.	Assessment criteria required by the specificity of the enterprise system .....	218

3.8.3.	Selected approaches to the evaluation of an enterprise system .....	219
3.8.4.	ABCD assessment method and the MRP II system implementation class .....	221
3.8.5.	Criteria for evaluating the application of the enterprise system in an organisation .....	224
3.8.6.	Stages of the process of evaluating the application of an integrated system.....	226
