List of reviewers 7

Activities in Navigation. Introduction 9
A. Weintrit

Chapter 1. *Safety of Navigation* 11

1.1. Safety of Navigation – Conceptual Foundation 13
V.G. Torskiy, V.P. Topalov & M.V. Chesnokova

1.2. To the Question of Vessels Safety Ensuring in the Emergency Situations 19
E.P. Burakovskiy & P.E. Burakovskiy

1.3. Safety of Dynamic Positioning 25
R. Gabruk & M. Tsymbal

1.4. New Layout of Mrzeżyno Port Entrance Design - Results by Real Time Simulation Study 33
A. Bąk & L. Gucma

1.5. Safety of Offshore Supply Operations 41
J. Pawelski

1.6. Risk Evaluation Model for Management of Navigation Safety in an Entire Ship Route Area 47
S. Hwang, E. Kobayashi, N. Wakabayashi & N. Im

1.7. The Identification of typical Hazards and Limitations to the Commercial Shipping Safety, Created by Offshore Activity and Crew Transfer High Speed Crafts, Operating in the Vicinity of the Intensive Traffic Flow Areas 55
G. Szyca

1.8. Physical Characteristics of Virtual Aids to Navigation 61
R.G. Wright & M. Baldauf

1.9. Analysis and Decision-making for Control of Extreme Situation of Fishing Vessels on the Base Dynamic Model of Catastrophe 69
E.P. Burakovskiy, Yu.I. Nechaev, P.E. Burakovskiy & V.P. Prokhnich

1.10. A Case Study in Flawed Accident Investigation 79
E. Doyle

Chapter 2. *Navigational Bridge Equipment* 85

2.1. Radar Detection in Duct Situations in Maritime Environment. The Vital Influence of the Radar Antenna Height 87
F.X. Hofele

2.2. Signal Processing Optimization in the FMCW Navigational Radars 95
V. Koshevyy & O. Pashenko

2.3. Autopilot Using the Nonlinear Inverse Ship Model 101
K. Kula

2.4. Reliability and Exploitation Analysis of Navigational System Consisting of ECDIS and ECDIS Back-up Systems 109
A. Weintrit, P. Dziula, M. Siergiejczyk & A. Rosiński

Chapter 3. *Automatic Identification System (AIS)* 117

3.1. An Analysis of Ship Behavior Induced by the Great East Japan Earthquake Tsunami Based on AIS 119
X. Liu, S. Shiotani & K. Sasa

3.2. Onboard AIS Reception Performance Advances for a Small Boat 125
K. Tokudome, Y. Arai, S. Okuda, A. Hori & H. Matsumoto

3.3. A Subject of Class B AIS for Small Trawler 131
H. Matsumoto & M. Furusho

3.4. Research on the Real Movement of Container Ship between Japan, China, and South Korea Using AIS Data 135
X. Gao, H. Makino & M. Furusho

3.5. Modeling of Observed Ship Domain in Coastal Sea Area Based on AIS Data 143
R. Miyake, J. Fukuto & K. Hasegawa

Chapter 4. *Route Planning* 151

4.1. Safe Ship Trajectory Planning Based on the Ant Algorithm – the Development of the Method 153
A. Lazarowska

4.2. Ship Evolutionary Trajectory Planning Method with Application of Polynomial Interpolation 161
P. Kolendo & R. Śmierzchalski

4.3. Supply and Demand of Transit Cargo Along the Northern Sea Route 167
T. Kiiski

4.4. Northern Labyrinths as Navigation Network Elements 177
A.N. Paranina & R. Paranin
4.5. Ship's Route Planning in Ice Infested Areas of Northern Svalbard Following Ice Charts Made by Remote Sensing Methods 181
T. Pastusiak

***Chapter 5.** Anti-Collision and Collision Avoidance* 193

5.1. Apprisal of the Coordinability of the Vessels for Collision Avoidance Maneuvers by Course Alteration 195
A. Volkov, E. Pyatakov & A. Yakushev
5.2. Comparison of Anti-collision Game Trajectories of Ship in Good and Restricted Visibility at Sea 201
J. Lisowski
5.3. Concretization of the Concept "Nearly Reciprocal Course" in Rule 14 of Colreg-72 211
V.M. Bukaty
5.4. Visualization of Holes and Relationships Between Holes and Latent Conditions 215
K. Fukuoka

***Chapter 6.** Global Navigation Satellite System (GNSS)* 223

6.1. Nominal Unique BeiDou Satellite Constellation, its Advantages and Disadvantages 225
J. Januszewski
6.2. Experiments with Reception of IRNSS Satellite Navigation Signals in the S and C Frequency Bands 231
J. Svatoň & F. Vejražka
6.3. Evaluation of a Low Cost Tactical Grade MEMS IMU for Maritime Navigation 237
R. Ziebold, M. Romanovas & L. Lanca

***Chapter 7.** Aviation* 247

7.1. Use of Passive Surveillance Systems in Aviation 249
M. Džunda, N. Kotianová, K. Holota & P. Žák
7.2. The Concept of the SWIM System in Air Traffic Management 255
K. Krzykowska, M. Siergiejczyk & A. Rosiński
