

TABLE OF CONTENTS

ACKNOWLEDGEMENTS	XI
ABOUT THE AUTHOR	XII
PREFACE.....	XIII
HOW TO ACCESS TRAINING FILES	XIV
SECTION 1 -	1
THE STRESS ANALYSIS ENVIRONMENT	3
THE FINITE ELEMENT METHOD (FEM) - AN OVERVIEW	3
TYPES OF FINITE ELEMENT METHOD (FEM) ELEMENTS	4
METHODS TO ENHANCE FINITE ELEMENT METHOD (FEM) RESULTS	7
<i>H-P convergence</i>	8
LINEAR AND NONLINEAR ANALYSIS	9
<i>Linear analysis</i>	9
<i>Nonlinear analysis</i>	10
STATIC ANALYSIS - AN OVERVIEW.....	10
<i>Stress singularities</i>	11
MODAL ANALYSIS- AN OVERVIEW.....	14
<i>Natural frequencies – Basic theory</i>	15
<i>Preloaded modes</i>	16
STRESS ANALYSIS WORKFLOW	17
STRESS ANALYSIS USER INTERFACE	17
<i>Stress Analysis browser</i>	18
<i>Stress Analysis graphic window</i>	18
<i>Stress Analysis panel</i>	19
MANAGE TAB	20
<i>Create Study</i>	20
Static Analysis	21
Modal Analysis	23
Shape Generator	24
Contacts	30
<i>Parametric Table</i>	32
MATERIAL TAB.....	35
CONSTRAINTS TAB.....	37

<i>Fixed constraint</i>	37
<i>Pin constraint</i>	37
<i>Frictionless Constraint</i>	38
LOADS TAB.....	38
<i>General loads</i>	38
<i>Face loads</i>	39
<i>Body loads</i>	39
CONTACTS TAB	40
<i>Types of contacts</i>	40
<i>The process of creating contacts</i>	42
PREPARE TAB.....	43
<i>Find Thin Bodies</i>	43
<i>Midsurface</i>	44
<i>Offset</i>	44
<i>Example 1 – Thin Elements</i>	45
MESH TAB	47
<i>Manual mesh refinement</i>	47
<i>Example 2 – Mesh Settings</i>	48
<i>Automatic mesh refinement (or automatic convergence)</i>	51
<i>Example 3 – Automatic Convergence</i>	52
<i>Example 4 – Manual Convergence</i>	54
RESULTS TAB	55
<i>Animate</i>	56
<i>Probe</i>	56
<i>Convergence plot</i>	57
DISPLAY TAB.....	57
<i>Apply uniform scale</i>	58
<i>Color Bar</i>	58
<i>Show probe labels</i>	59
<i>Show Maximum and Minimum values</i>	59
<i>Show boundary conditions</i>	60
<i>Display results</i>	60
<i>Adjust displacement display</i>	61
REPORT TAB	61

GUIDE TAB.....	63
SETTINGS TAB.....	64
SECTION 2 -.....	65
DP1 – CYCLIC SYMMETRY ANALYSIS	67
KEY FEATURES AND WORKFLOWS INTRODUCED IN THIS DESIGN PROBLEM	67
<i>Cyclic symmetry</i>	67
<i>Manual convergence of results</i>	67
INTRODUCTION.....	67
WORKFLOW OF DESIGN PROBLEM 1.....	68
<i>Idealization</i>	68
Cyclic symmetry – Split model into a single blade	69
<i>Boundary conditions</i>	70
Apply load and constraints.....	71
Specify symmetry conditions	72
<i>Run simulation and analyse</i>	73
Manual convergence of results.....	74
<i>Optimisation</i>	78
Investigate the effect of the thickness of the fan blade.....	78
Change material	81
DP2 – ASSEMBLY OPTIMISATION.....	83
KEY FEATURES AND WORKFLOWS INTRODUCED IN THIS DESIGN PROBLEM	83
<i>Assembly contacts - Manual and Automatic</i>	83
<i>Local mesh refinement</i>	83
<i>Planar X, Y, Z stress plots</i>	83
<i>Parametric optimisation</i>	83
INTRODUCTION.....	83
WORKFLOW OF DESIGN PROBLEM 2.....	85
<i>Idealization</i>	85
<i>Boundary Conditions</i>	87
<i>Run simulation and analyse</i>	92
<i>Optimisation</i>	96
DP3 – BOLTED CONNECTION	99

KEY FEATURES AND WORKFLOWS INTRODUCED IN THIS DESIGN PROBLEM.....	99
<i>Symmetry conditions.....</i>	99
<i>Simulating bolt preloads</i>	99
<i>Non-linear contacts.....</i>	99
<i>Local mesh refinement.....</i>	99
<i>Displaying symmetrical results using ground plane and reflections</i>	99
INTRODUCTION	99
WORKFLOW OF DESIGN PROBLEM 3	100
<i>Idealization.....</i>	101
<i>Boundary conditions</i>	103
<i>Run simulation and analyse</i>	108
DP4 – PROPSHAFT	113
KEY FEATURES AND WORKFLOWS INTRODUCED IN THIS DESIGN PROBLEM.....	113
<i>Moment Load.....</i>	113
<i>Section View to view internal results.</i>	113
<i>Dummy component to transfer load.....</i>	113
INTRODUCTION	113
WORKFLOW OF DESIGN PROBLEM 4	114
<i>Idealization.....</i>	114
<i>Boundary conditions</i>	115
<i>Run simulation and analyse</i>	117
DP5 – WELDMENT ANALYSIS.....	121
KEY FEATURES AND WORKFLOWS INTRODUCED IN THIS DESIGN PROBLEM.....	121
<i>Weld Calculator.....</i>	121
<i>Interpreting results with and without welds.....</i>	121
INTRODUCTION	121
WORKFLOW OF DESIGN PROBLEM 5	122
<i>Idealization.....</i>	122
<i>Boundary conditions</i>	123
<i>Run simulation and analyse</i>	124
Rerun simulation as assembly and compare results.....	125
<i>Run simulation and analyse</i>	130

DP6 – ASSEMBLY ANALYSIS WITH BUILT-IN WELDS	135
KEY FEATURES AND WORKFLOWS INTRODUCED IN THIS DESIGN PROBLEM	135
<i>Automatic bonded contacts - Welded fabricated structure analysis</i>	<i>135</i>
<i>Multiple-loads</i>	<i>135</i>
<i>Interpretation of results with stress singularities present</i>	<i>135</i>
INTRODUCTION	135
WORKFLOW OF DESIGN PROBLEM 6	136
PART 1-CHASSIS DESIGN WITH WELDS AND RHS CHANNEL RADII.....	137
<i>Idealization</i>	<i>137</i>
<i>Boundary conditions</i>	<i>138</i>
<i>Run simulation and analyse</i>	<i>142</i>
<i>Optimisation</i>	<i>144</i>
SECTION 3 -	145
DP7 – WIND LOAD ANALYSIS	147
KEY FEATURES AND WORKFLOWS INTRODUCED IN THIS DESIGN PROBLEM	147
<i>Effective use of multi-bodies with respect to different mid surface thicknesses.....</i>	<i>147</i>
<i>Creating surfaces using midsurface command</i>	<i>147</i>
<i>Mixed solid and shell elements analysis</i>	<i>147</i>
<i>Wind speed load converted to force</i>	<i>147</i>
INTRODUCTION	147
WORKFLOW OF DESIGN PROBLEM 7	148
<i>Idealization</i>	<i>149</i>
<i>Boundary conditions</i>	<i>152</i>
<i>Run simulation and analyse</i>	<i>154</i>
DP8 – FABRICATION ANALYSIS	157
KEY FEATURES AND WORKFLOWS INTRODUCED IN THIS DESIGN PROBLEM	157
<i>Creating Surfaces using Midsurface command.....</i>	<i>157</i>
<i>Creating Surfaces using Offset command.....</i>	<i>157</i>
<i>Combined thin and solid elements.....</i>	<i>157</i>
INTRODUCTION	157
WORKFLOW OF DESIGN PROBLEM 8	158
<i>Idealization</i>	<i>159</i>

<i>Boundary conditions</i>	160
<i>Run simulation and analyse</i>	164
DP9 – SHEET METAL ANALYSIS	169
KEY FEATURES AND WORKFLOWS INTRODUCED IN THIS DESIGN PROBLEM.....	169
<i>Symmetry conditions using thin elements</i>	169
<i>Displaying symmetrical results using ground plane and reflections</i>	169
INTRODUCTION	169
WORKFLOW OF DESIGN PROBLEM 9	170
<i>Idealization</i>	171
<i>Boundary conditions</i>	172
<i>Run simulation and analyse</i>	175
DP10 – 20G ACCELERATION	179
KEY FEATURES AND WORKFLOWS INTRODUCED IN THIS DESIGN PROBLEM.....	179
<i>Idealization including shrinkwrap with multibodies</i>	179
<i>Manual contacts</i>	179
<i>Acceleration loads</i>	179
INTRODUCTION	179
WORKFLOW OF DESIGN PROBLEM 10	180
<i>Idealization</i>	180
<i>Boundary conditions</i>	185
<i>Run simulation and analyze</i>	187
SECTION 4 -	191
DP11 – MODAL ANALYSIS	193
KEY FEATURES AND WORKFLOWS INTRODUCED IN THIS DESIGN PROBLEM.....	193
<i>Modal shapes and natural frequencies</i>	193
<i>Modal optimisation</i>	193
INTRODUCTION	193
WORKFLOW OF DESIGN PROBLEM 11	194
<i>Idealization</i>	194
<i>Boundary conditions</i>	195
<i>Run Simulation and Analyse</i>	197
<i>Optimisation</i>	199

SECTION 5.....	201
THE FRAME ANALYSIS ENVIRONMENT	203
FRAME ANALYSIS OVERVIEW	203
FRAME ANALYSIS WORKFLOW	204
FRAME ANALYSIS USER INTERFACE	205
<i>Frame Analysis Browser</i>	205
<i>Frame Analysis Graphic Window</i>	205
<i>Frame Analysis Panel</i>	206
<i>Manage tab</i>	207
<i>Create Simulation</i>	207
BEAMS TAB	208
<i>Update</i>	208
<i>Properties</i>	208
<i>Material</i>	210
CONSTRAINTS TAB	210
Fixed constraint	211
<i>Pinned constraint</i>	211
<i>Floating Pinned constraint</i>	211
<i>Custom constraint</i>	213
LOADS TAB	214
<i>Force</i>	214
<i>Continuous load</i>	215
<i>Moment</i>	216
<i>Moment (general)</i>	216
<i>Bending Moment</i>	217
<i>Axial Moment</i>	217
<i>Example 1 – Cantilever model results compared with hand calculations</i>	217
<i>Example 2 – Simply supported beam created with custom constraint</i>	218
CONNECTIONS TAB	220
<i>Release</i>	220
<i>Example 3 – Releasing moments in Structure using Beam Release</i>	221
<i>Custom Node</i>	222
<i>Rigid link</i>	222

<i>Example 4 – Simple frame in which beams are connected without using rigid links</i>	<i>224</i>
<i>Example 5 – Frame Generator in which beams are connected using rigid links</i>	<i>224</i>
RESULT TAB.....	227
<i>Beam detail</i>	<i>227</i>
<i>Animate.....</i>	<i>227</i>
<i>Diagram</i>	<i>228</i>
<i>Probe</i>	<i>229</i>
DISPLAY TAB.....	229
<i>Color bar.....</i>	<i>230</i>
<i>Beam and node labels.....</i>	<i>230</i>
<i>Display results</i>	<i>231</i>
<i>Probe Labels.....</i>	<i>231</i>
<i>Adjust displacement display.....</i>	<i>232</i>
<i>Max and min values</i>	<i>232</i>
<i>Boundary conditions</i>	<i>233</i>
<i>Local systems</i>	<i>233</i>
<i>Load values</i>	<i>233</i>
PUBLISH TAB	234
<i>Report.....</i>	<i>234</i>
<i>Export.....</i>	<i>235</i>
FRAME ANALYSIS SETTINGS TAB	236
DP12 – FRAME ANALYSIS USING CONTENT CENTRE STRUCTURES	239
KEY FEATURES AND WORKFLOWS INTRODUCED IN THIS DESIGN PROBLEM.....	239
<i>Content center frames converted to beam elements.....</i>	<i>239</i>
<i>Tolerance settings – used to create rigid links automatically</i>	<i>239</i>
<i>Pinned constraints and continuous loading</i>	<i>239</i>
<i>Change material and beam properties</i>	<i>239</i>
INTRODUCTION	239
WORKFLOW OF DESIGN PROBLEM 12	241
<i>Idealization.....</i>	<i>241</i>
<i>Boundary conditions</i>	<i>242</i>
<i>Run simulation and analyse</i>	<i>245</i>
<i>Optimisation.....</i>	<i>247</i>

DP13 – FRAME ANALYSIS USING FRAME GENERATOR STRUCTURES.....	251
KEY FEATURES AND WORKFLOWS INTRODUCED IN THIS DESIGN PROBLEM	251
<i>Frames, created using Frame Generator, converted to beam elements.....</i>	<i>251</i>
<i>Tolerance settings – used to create rigid links automatically.....</i>	<i>251</i>
<i>Custom constraints and multiple forces.....</i>	<i>251</i>
<i>Beam diagram, detail and scales.....</i>	<i>251</i>
INTRODUCTION.....	251
WORKFLOW OF DESIGN PROBLEM 13.....	253
<i>Idealization</i>	<i>253</i>
<i>Boundary conditions</i>	<i>254</i>
<i>Run simulation and analyze.....</i>	<i>257</i>
DP14 – FRAME ANALYSIS USING ADVANCE SETTINGS	263
KEY FEATURES AND WORKFLOWS INTRODUCED IN THIS DESIGN PROBLEM	263
<i>Beams and beam releases to simulate Slings</i>	<i>263</i>
<i>Modifying and Creating Rigid Links</i>	<i>263</i>
<i>Custom Constraints with Stiffness Properties</i>	<i>263</i>
INTRODUCTION.....	263
WORKFLOW OF DESIGN PROBLEM 16.....	264
<i>Idealization</i>	<i>265</i>
<i>Boundary conditions</i>	<i>265</i>
<i>Run simulation and analyse.....</i>	<i>272</i>
