

## Proceedings contents

### OPENING PLENARY SESSION

- 1 Humanitarian operations – Not a grey area?**  
*R D W Goddard, D M Horner, S J Pedder, C L Pipkin, Steller Systems, UK*
  
- 14 Australian Landing Helicopter Dock; a tale of successful design and construction spanning two hemispheres**  
*B J Corden-McKinley, H V Rafati, BAE Systems Australia, Australia*
  
- 24 Using airwake simulation to inform flight trials for the Queen Elizabeth Class Carrier**  
*M F Kelly, M White, I Owen, University of Liverpool, UK; S J Hodge, BAE Systems, UK*

### PARALLEL SESSION A: ACTIVE | UXV

- 37 Innovative integration: Unmanned systems coming of age**  
*G H Sturtevant, Cdr Dr C G LaPointe USN, US Navy, USA; J M Voth, Herren Associates, Inc., USA*
  
- 47 Architectural developments to enable the integration of unmanned vehicles into the maritime system of systems**  
*Dr P Smith, Dstl, UK; W Biggs, T Rabbets, QinetiQ, UK*
  
- 56 Utilising unarmed unmanned surface vehicles in the ‘Triple A Navy’**  
*D T Alldis, MOST (Autonomous Vessels) Ltd, UK*
  
- 63 Future of OPV design: Interaction with unmanned systems driving change**  
*H J Newton, Babcock International Group, UK*
  
- 74 21st Century warship multi-functionality impact on mission bay handling systems**  
*B C Morrow, Rolls-Royce, Canada*
  
- 82 The hydrodynamic interactions of an Unmanned Underwater Vehicle in the proximity of its mother submarine**  
*S D Downie, Babcock International Group, UK*

## PARALLEL SESSION B: ADAPTIVE | 'L' POWER AND PROPULSION

- 91 High performance electrical distribution design: Managing the technical risks associated with supporting increasing combatant electrical power demand**  
*S W Laing, Rolls-Royce Marine Electrical Systems, UK*
- 103 The cancellation of dual winding harmonic coupling by winding design**  
*Prof C G Hodge OBE FREng, BMT Defence Services/University of Warwick, UK; Prof J F Eastham FREng FRSE, University of Bath, UK*
- 111 Protective devices for DC power networks**  
*Dr R W Meggs, C Pollard, BMT Defence Services, UK*
- 123 The process and documentation needed to assure a risk-based approach to EMC for naval vessels, enabling the use of COTS equipment**  
*C J J van der Ven, RH Marine Netherlands BV, the Netherlands; R Bridgeman, Lloyd's Register EMEA, UK; P Beirne, Ricardo Rail Ltd, UK; J G Bergsma, Thales Nederland, the Netherlands; W G M Haverkamp, Damen Shipyards, the Netherlands; G J J A Mol, Damen Schelde Naval Shipbuilding, the Netherlands; B J A M van Leersum, University of Twente, the Netherlands; J van Polen, Defence Materiel Organisation, the Netherlands*
- 132 Earth fault protection of transformer-less power conversion systems**  
*Dr T Long, M Butcher, Dr M Benatmane, GE Power Conversion, UK*
- 148 Power system design considerations when integrating electromagnetic railguns with electric warships**  
*I Whitelegg, Marine Research Group UCL, UK*

## PARALLEL SESSION C: AFFORDABLE | MAINTENANCE

- 161 The exploitation of deployed health monitoring support at sea for aircraft and general ship systems**  
*Lt A J Vance RN, J Day, 1710 Naval Air Squadron, UK*
- 170 Evolving specialist support for naval aviation: Deployed condition monitoring**  
*N Amaratunga-Brearley, M Easom, 1710 Naval Air Squadron, UK*
- 184 Using the past to predict the future**  
*G Simpson, A Harris, Babcock International Group, UK*
- 194 Moving from planned to Condition Based Maintenance**  
*S J Cort, GE Power Conversion, UK*
- 204 De-risking activity to replace the QEC brake blades**  
*P J Midgley, BAE Systems, UK; J C Ember, Ministry of Defence, UK*

- 212 In-bore submarine tailshaft inspection**  
*T D Goode, Babcock International Group, UK*

#### **PARALLEL SESSION D: ACTIVE | COMBAT SYSTEMS**

- 221 Environmentally aware combat system – Exploitation of sensor data**  
*Dr W Dawber, Dr H Wheelwright, W Wallace, QinetiQ, UK*
- 230 A unified, model-based, approach to design, integration and performance assessment of naval combat systems, with application to the Type 26 Global Combat Ship Combat System**  
*H Williams, BAE Systems, UK*
- 245 Mission modularity and the active, adaptable fleet – A NATO perspective**  
*D Manley, Ministry of Defence, UK; R A Logtmeijer, Defence Materiel Organisation, the Netherlands; J Lin, Naval Sea Systems Command, USA*
- 254 Utility-based scheduling of mission tasks on board of naval ships**  
*R J Dekker, B J H Bakker, J M de Gier, P Hanckmann, Y Rieter-Barrell, TNO, the Netherlands*
- 260 Blast resistant composite structures**  
*Ing A G van Erkel, Dr C van 't Hof, TNO, the Netherlands; J A A Vaders, Defence Materiel Organisation, the Netherlands; A Lönnö, FMV, Sweden; Dr A Groves, Dstl, UK*
- 275 Conceptual study of corner reflectors as a decoy for preventing damage**  
*Dr H J Kang, Dr D Lee, KRISO (Korea Research Institute of Ships and Ocean Engineering), Korea; Prof K Kim, Tongmyong University, Korea; Dr H-K Yang, Keumha Naval Technology Co., Ltd, Korea*

#### **PARALLEL SESSION E: ADAPTIVE | DESIGN RULES**

- 282 Submarine Rules**  
*R Townsend, Lloyd's Register EMEA, UK*
- 301 Cost effective naval safety with goal based regulation (The Naval Ship and Submarine Codes)**  
*Cdr R Fransbergen RNLN, International Naval Safety Association/Ministry of Defence, the Netherlands; P James, J McKay, International Naval Safety Association/Lloyd's Register EMEA, UK*
- 316 Maintaining capability through independent assurance of machinery in naval platforms**  
*J K Gorton, Lloyd's Register, UK*

## PARALLEL SESSION F: ADAPTIVE | PLATFORM MANAGEMENT SYSTEMS

- 326 QEC IPMS – The training challenge and an affordable response**  
*R Hunt, L-3 Communications Marine Systems UK Ltd, UK*
- 333 Type 26 – Engineering the adaptive Platform Management System**  
*W Miners, L-3 Communications Marine Systems UK Ltd, UK*
- 345 Designing for 'big data' and change resilience as part of QEC IPMS and HVAC integration**  
*M J Egan, J K McKelvie, L-3 Communications Marine Systems UK Ltd, UK*

## PARALLEL SESSION G: AFFORDABLE | MANNING AND AUTOMATION

- 352 GAUDI: Innovative architecture for integrated maritime mission systems in support of advanced optimised manning concepts**  
*Dr J Skowronek, Thales Nederland BV, the Netherlands; Dr M Ditzel, TNO, the Netherlands; Cdr J C Schreurs RNLN, Defence Materiel Organisation, the Netherlands; L Franke, RH Marine, the Netherlands; P Rozendaal, Damen Schelde Naval Shipbuilding, the Netherlands*
- 363 Workflow technology in Naval applications: Problems and opportunities**  
*Dr J van Diggelen, T Vogel, Dr W M Post, TNO, the Netherlands; Lt Cdr S A van 't Hart, Defence Materiel Organisation, the Netherlands*
- 372 Autonomous, adaptive, aware: DINCS**  
*Dr J A A J Janssen, TNO, the Netherlands; J Butler, Frazer-Nash Consultancy Ltd, UK; P Worthington, BAE Systems, UK; Lt Cdr F D Geertsma RNLN, Defence Materiel Organisation, the Netherlands; Lt M Den Hartog RNLN, Ministry of Defence, UK*
- 383 Adaptive automation to maximise warship capabilities during incidents**  
*E J Middeldorp, R Wouters, RH Marine, the Netherlands; Lt Cdr F D Geertsma RNLN, Ir N A Badon Ghijben, Royal Netherlands Navy, the Netherlands*
- 392 The future role of virtual reality within warship support solutions for the Queen Elizabeth Class aircraft carriers**  
*R Basketter, C Birchmore, A Fisher, BAE Systems, UK*
- 400 The UK Naval Engineering Science and Technology Skills Gap – Recruitment and retention**  
*K Heaney, BMT Defence Services Ltd, UK; C Shewell, E Gray, Babcock International Group, UK*

## PARALLEL SESSION H: ACTIVE | HYBRID PROPULSION

- 418 Power & propulsion – Meeting the concept**  
*T Couch, J Fisher, BMT Defence Services, UK*
- 429 Advanced hybrid systems and new integration challenges**  
*O J Simmonds, GE Power Conversion, UK*
- 439 Hybrid propulsion: A design package for analysis and optimisation**  
*A Bhatt, Rolls-Royce, UK; Sub-Lt N A Arsenie RNLN, University College London, UK*
- 450 Development of a hybrid propulsion simulation model**  
*H-J Boonen, Damen Shipyards, the Netherlands*
- 464 Faster RNLN's landing craft utilities in a new concept of operations**  
*M J Cordia, C J C M Posthumus, Defence Materiel Organisation, the Netherlands*
- 476 Torque control for diesel mechanical and hybrid propulsion on naval vessels**  
*Lt Cdr R D Geertsma RNLN, Delft University of Technology/Netherlands Defence Academy, the Netherlands; Dr R R Negenborn, Ir K Visser, Prof Ir J J Hopman, Delft University of Technology, the Netherlands*

## PARALLEL SESSION I: ADAPTIVE | INTEGRATION

- 493 Total ship integration, why, and is it possible?**  
*T Drywood, C Jubb, T Dando, BMT Defence Services, UK*
- 502 Designing marine systems in complex warships: An exploration into the deployment of model based systems engineering**  
*W J Tudor, C Bach, BAE Systems, UK*
- 515 Facing the challenges of integration and physical constraints when replacing major equipment in old platforms**  
*D Bainbridge, S McCance, Naval Design Partnering Team, UK*
- 528 Developments in shore based testing to meet latest marine power system integration challenges**  
*G Bellamy, B Salter, GE Power Conversion, UK*
- 537 Improving the design integrity of complex warships within an alliancing maritime enterprise**  
*T Drywood, D Ridgwell, I Langley, BMT Defence Services, UK*
- 548 De-risking strategy for the Type 26 Global Combat Ship electrical power and propulsion system**  
*N McNaughtan, G McKinstry, R Wereski, BAE Systems, UK*

## PARALLEL SESSION J: AFFORDABLE | SHIP SUPPORT

- 564 What is the ideal maintenance strategy? A look at both MoD and commercial shipping best practice**  
*N A Tomlinson, BMT Defence Services, UK*
- 577 Operational maintenance and repair – An enterprise approach**  
*Cdr N Boyd RN, Lt Cdr I Wallace RN, Royal Navy, UK*
- 585 Warship innovative support planning**  
*I R Cowper, G Simpson, Babcock International Group, UK*
- 596 Deployable, reconfigurable, affordable and repurposable naval bases of the future**  
*Lim S H, EMAS Consultants LLP, Singapore; Prof Wang C M, National University of Singapore, Singapore; D J Peters, Royal HaskoningDHV, the Netherlands*
- 606 Navy's waste at commercial shipyard**  
*A S Ghowel, Arab Ship Repair and Building Company, Bahrain*
- QEC build progress**  
*Capt S Thompson RN, Ministry of Defence, UK (Presentation only)*

## PARALLEL SESSION K: ACTIVE | PROPULSION

- 612 The advantages and disadvantages of using variable speed pumps in commercial and naval marine applications**  
*R D Taylor, Babcock International Group, UK*
- 620 Supercritical Organic Rankine Cycle yields useful power and emissions benefits**  
*J Buckingham, BMT Defence Services, UK; S McCracken, Granite Power Limited, Australia*
- 635 Hull vane on Holland-Class OPVs – A CFD analysis of the effects on seakeeping**  
*B Bouckaert, K Uithof, Hull Vane BV, the Netherlands; N Moerke, Van Oossanen Fluid Dynamics, the Netherlands; P van Oossanen, Van Oossanen Naval Architects, the Netherlands*
- 645 The hydrodynamic challenges to designing mixed propulsor propulsion systems**  
*G Grunditz, P Lindqvist, Dr M Hyensjö, Rolls-Royce AB, Sweden*
- 656 Magnetically geared propulsion motors for naval applications**  
*Dr D Powell, G Wilson, A Myers, Magnomatics Limited, UK*
- 665 The certification of the new MT7 marine gas turbine**  
*P McCoy, M Greer, P Jones, Rolls-Royce Marine North America, Inc., USA*

## PARALLEL SESSION L: ADAPTIVE | SHIP DESIGN

- 677 Air flow and superstructure interaction on a model of a naval ship**  
*A Ariffin, ENSTA Bretagne, France*
- 686 Colossus 21: Affordable naval aviation for the 21st Century**  
*E Waters, Babcock International Group, UK*
- 702 Providing a resilient flight deck coating for the Queen Elizabeth Class Aircraft Carrier**  
*Lt Cdr A G Duthie RN, Ministry of Defence, UK*
- 716 Making The Duke less of a drag! The Type 23 hydrodynamics improvement programme**  
*G N Lidiard, Capt J J Bailey RN, Ministry of Defence, UK; C Pyke, N Ireland, QinetiQ, UK; T Dinham-Peren, BMT Defence Services, UK*
- 728 Potential benefits of an integrated mechanised stores management and handling system for future naval auxiliary vessels**  
*H Schweidler, M Eaton, Babcock International Group, UK*
- 741 Risk-based design – Realising the Triple-A Navy**  
*Prof D Vassalos, University of Strathclyde, UK; Prof M Fan, BAE Systems, UK*

## PARALLEL SESSION M: AFFORDABLE | ENERGY EFFICIENCY

- 754 Some thoughts on an Energy Efficiency Design Index for naval ships**  
*Prof D Stapersma, Delft University of Technology, the Netherlands*
- 764 Energy recovery and control methods for HVAC systems in naval ships**  
*Y Abbas, Babcock International Group, UK*
- 780 Naval platform HVAC solutions to meet future IMO energy efficiency legislation**  
*L Ross, BMT Defence Services, UK*
- 789 Energy management – adapt your engine to every mission**  
*A Breijts, E El Amam, RH Marine, the Netherlands*
- 797 Integration, optimisation and benefits of energy storage for marine applications**  
*Dr D Radan, M Southall, Dr M Benatmane, M Butcher, GE Power Conversion, UK*
- 810 Hydraulic or not hydraulic (actuation)? That is the question**  
*C Meddelton, Dr R W Meggs, BMT Defence Services, UK; R Cooke, Atlas Elektronik UK, UK*

## CLOSING PLENARY SESSION

**817 Marinearsenal Maintenance Channel (MMC)**

*M Schubert, Marinearsenal, Germany*

**823 The 'cyber enabled ship' – What does it mean for the operators and regulators**

*T Berry, J Stokes, B Twomey, Lloyd's Register, UK*

**Naval and commercial ship procurement – A comparison and consideration of the issues raised**

*Rear Adml N Guild CB FREng; R Vie FREng, UK (Presentation only)*

## POSTER PRESENTATIONS

**832 The challenge of applying systems engineering to in-service support 30 years after design**

*A Harris, Babcock International Group, UK*

**839 Capability verse design implication of a payload module on future underwater platforms**

*B T Fisher, Babcock International Group, UK*

**849 Crew design tool**

*Dr J van Diggelen, J B Janssen, TNO, the Netherlands; W A van den Tol, Defence Materiel Organisation, the Netherlands*

**856 Special Forces Containers – A research into the feasibility and behaviour of steel inserts glued into composite pressure vessels**

*Sub-Lt (TD) K N D Stouten RNLN, Delft University of Technology/Netherlands Defence Academy, the Netherlands*
