

# CONTENTS

	PAGE
PRELIMINARY . . . . .	1
CHAPTER I	
INSTRUMENTS AND FITTINGS . . . . .	5
Sextants and Stands—Horizon—Theodolite—Station Pointer— Scales — Straight-edges — Chains — Protractors — Pocket Aneroids — Helio-stat — Ten-foot Pole — Range-finder — Drawing-Boards — Weights — Transfer Paper — Paper — Books — Chronometers — Marks — Boat's Fittings — Lead- lines—Beacons.	
CHAPTER II	
A MARINE SURVEY IN GENERAL . . . . .	59
CHAPTER III	
BASES . . . . .	66
By Chain—By difference of Latitude—By Mast-head Angle—By Angle subtended by known length—By Range-finder—By Measured Rope—By Sound.	
CHAPTER IV	
THE MAIN TRIANGULATION . . . . .	78
General—Making a Main Station—False Station—Sketch—Con- vergency—Calculation—Co-ordinating Astronomical Observa- tions with Triangulation.	
CHAPTER V	
PLOTTING . . . . .	118
Irregular method of Plotting—Examples—Fixing Marks—Calcu- lating a position from two Angles to three known Objects— Drawing Rectangular Lines.	

CHAPTER VI		PAGE
RUNNING SURVEY	- - - - -	174
Modified Running Survey—Sketch Survey by Compass Bearings and Vertical Angles.		
CHAPTER VII		
COAST-LINING	- - - - -	185
CHAPTER VIII		
SOUNDING	- - - - -	194
Boat Sounding—Ship Sounding—Searching for Vigias.		
CHAPTER IX		
TIDES	- - - - -	219
Automatic Tide-Gauge—Tidal Diagrams and Approximate Predictions of Tides—Admiralty Method of Discussion of Tidal Observations—Tidal Streams and Surface Currents—Mean Sea Level		
CHAPTER X		
TOPOGRAPHY	- - - - -	251
CHAPTER XI		
HEIGHTS	- - - - -	257
By Theodolite—By Sextant—Obtaining Distance from Elevation of a known Height—Levelling.		
CHAPTER XII		
OBSERVATIONS FOR LATITUDE	- - - - -	271
By Circum-meridian Altitudes of Stars—By Circum-meridian Altitudes of Sun.		
CHAPTER XIII		
OBSERVATIONS FOR ERROR OF CHRONOMETER	- - - - -	292
General remarks on obtaining Longitude—Chronographs for Use in the Field—Error by Equal Altitudes—Sextant Observations for Time at an Observatory—Errors by Two Stars at Equal Altitude.		

# CONTENTS

xi

## CHAPTER XIV

PAGE

MERIDIAN DISTANCES - - - - -	326
Telegraphic—Chronometric.	

## CHAPTER XV

TRUE BEARING - - - - -	351
By Theodolite—By Sextant—Variation.	

## CHAPTER XVI

SEA OBSERVATIONS - - - - -	364
Double Altitude—Sumner's Method—New Navigation—Short Equal Altitude—Circum-meridian Altitudes of Sun.	

## CHAPTER XVII

THE COMPLETED CHART - - - - -	373
Fair Chart—Reducing Plans—Reducing Plans by Photography— Delineation—Symbols—Colouring—Graduation.	

## CHAPTER XVIII

DEEP-SEA SOUNDINGS - - - - -	391
Wire Sounding—Dredging—Nature of Ocean Bottom—Submarine Sentry.	

## CHAPTER XIX

MISCELLANEOUS - - - - -	409
Distortion of Printed Charts—Sailing Directions—Observations on Under-Currents—Pillsbury Current Meter—Exploring a River —Swinging Ship.	

## CHAPTER XX

SUPPLEMENTAL - - - - -	422
Simplified Method of Ship Sounding—Roller Sounding—Sounding Traveller—Sweeping—Vacuum Tide-Gauge—Tidal Observa- tions from Ship at Anchor—Plotting—Fixing Positions— Rectangular Co-ordinates—Recent Developments.	

## CHAPTER XXI

TRIANGULATION BY MEANS OF FLOATING MOORED BEACONS - - -	472
---	-----
