About the Technical Reviewer ix

Introduction xi

Chapter 1: Feedforward Networks..... 1

 Review of Multiple-Layer Feedforward Networks..... 1

 Wide vs. Deep Nets 4

 Locally Connected Layers 6

 Rows, Columns, and Slices..... 7

 Convolutional Layers 8

 Half-Width and Padding..... 9

 Striding and a Useful Formula..... 12

 Pooling Layers..... 14

 Pooling Types..... 14

 The Output Layer..... 15

 SoftMax Outputs..... 15

 Back Propagation of Errors for the Gradient 18

Chapter 2: Programming Algorithms..... 23

 Model Declarations 24

 Order of Weights and Gradient 25

 Initializations in the Model Constructor 26

 Finding All Activations 29

 Activating a Fully Connected Layer..... 30

 Activating a Locally Connected Layer 31

TABLE OF CONTENTS

Activating a Convolutional Layer	34
Activating a Pooling Layer	36
Evaluating the Criterion.....	39
Evaluating the Gradient.....	42
Gradient for a Fully Connected Layer	46
Gradient for a Locally Connected Layer	48
Gradient for a Convolutional Layer.....	51
Gradient for a Pooled Layer (Not!).....	52
Backpropagating Delta from a Nonpooled Layer	53
Backpropagating Delta from a Pooled Layer.....	56
Multithreading Gradient Computation.....	58
Memory Allocation for Threading	63
Chapter 3: CUDA Code.....	67
Weight Layout in the CUDA Implementation	68
Global Variables on the Device.....	69
Initialization.....	71
Copying Weights to the Device.....	72
Activating the Output Layer.....	79
Activating Locally Connected and Convolutional Layers	81
Using Shared Memory to Speed Computation.....	88
Device Code.....	93
Launch Code.....	99
Activating a Pooled Layer.....	101
SoftMax and Log Likelihood by Reduction	105
Computing Delta for the Output Layer	109
Backpropagating from a Fully Connected Layer	111
Backpropagating from Convolutional and Local Layers.....	113
Backpropagating from a Pooling Layer.....	119
Gradient of a Fully Connected Layer	122
Gradient of a Locally Connected or Convolutional Layer.....	124

Flattening the Convolutional Gradient	129
Launch Code for the Gradient.....	131
Fetching the Gradient.....	135
Putting It All Together	141
Chapter 4: CONVNET Manual.....	147
Menu Options	147
File Menu.....	147
Test Menu	149
Display Menu	150
Read Control File.....	150
Making and Reading Image Data	151
Reading a Time Series as Images	151
Model Architecture	155
Training Parameters	156
Operations	159
Display Options	160
Display Training Images	160
Display Filter Images	160
Display Activation Images.....	161
Example of Displays	162
The CONVNET.LOG file.....	166
Printed Weights	169
The CUDA.LOG File	172
Index.....	173
