

CONTENTS

PART I.

CHAPTER	PAGE
I. CHARTS AND SAILING DIRECTIONS	1-44
Portolan Charts	5-10
Prime Meridian	10-16
Rutters	16-21
Engraved Charts and Atlases	21-30
Plane Chart	30-33
Mercator Chart	32-38
Admiralty Charts and Sailing Directions	38-44
II. THE COMPASS	45-72
Lodestone	47
Introduction of the Compass into Europe	47-49
Early Development	49-51
Magnetism	51-53
Dip	53-54
Correction for Variation	54-55
Later Improvements	55-59
Investigation of Deviation	59-60
Correction of Deviation	60-66
Modern Compass	66-71
Gyro Compass	71-72
III. NAVIGATIONAL INSTRUMENTS	73-98
Astrolabe	73-76
Cross Staff	76-77
Back Staff and Davis Quadrant	77-81
Hadleys' Quadrant	81-84
Sextant	85-86
Artificial Horizon applied to The Quadrant and Sextant	86-90
Some uses of the Terrestrial Globe in Navigation	90-98

PART II.—OCEAN NAVIGATION

CHAPTER	PAGE
I. INTRODUCTION	99-107
II. FINDING OF LATITUDE	108-119
Meridian Altitude above and below the Pole	108-112
Ex-Meridian Observations	112-114
Pole Star and Other Stars	114-119
III. VARIATION OF THE COMPASS	120-154
Finding the Variation by Equal Altitudes	127-128
Amplitudes	129-133
Altitude Azimuth	133-135
Azimuth by Hour Angle	135-136
Investigation of Variation and its Uses	136-154

IV. LOG LINE AND LOG BOOK	155-177
Measurement of Distance and Speed	155-172
Journals and Log Books	172-174
Leeway	174-175
Current	175-176
Rough Logs	176-177
Use of Data Recorded in Log Books	177
V. NAVIGATION BY LATITUDE AND DEAD RECKONING	178-225
Steering a Course	179-182
Pricking the Chart and Setting the Course	182-184
To correct Dead Reckoning by an Observation for Latitude	184-187
Oblique Meridian	187-190
Plane and Mercator's Chart	190-195
Plane Sailing	195-199
Oblique Sailing	199-202
Parallel Sailing	202-206
Middle Latitude Sailing	207
Great Circle Sailing	207-217
Lead Line and Sounding	217-224
Echo Sounding	224-225
VI. LONGITUDE	226-258
By Eclipses of Jupiter's Satellites	230-232
By Occultation of Star	232-234
By Lunar Observations	234-241
Gulf Stream as an Indication of Longitude	241-243
Longitude by Chronometer	243-254
Sumner Lines	254-258
Marc St. Hilaire	258
VII. ELECTRONIC NAVIGATION	259-281
Development of Radio and Radio Direction Finding	259-261
Consol	261-262
Development of Radar	262-268
Gee	268-269
Loran "A" and "C" Systems	269-271
Decca Navigator	271-277
The Navy Navigation Satellite System	277-280
The Navstar/Global Positioning System	280-281
