

CONTENTS

	PAGE
CHAPTER I. Introduction,	I
„ II. The Composition of the Atmosphere,	25
„ III. Insolation and Screen Temperatures,	35
„ IV. Atmospheric Temperatures and Pressures,	52
„ V. Water Vapour, Temperature, and Pressure,	77
„ VI. Air Density and Water Vapour,	94
„ VII. Cyclones or Atmospheric Whirls,	104
„ VIII. Theory of the Winds,	115
„ IX. Theory of the Winds—Permanent Winds,	134
„ X. Theory of the Winds—Variable and Periodic Winds,	154
„ XI. Atmospheric Pressures in High Latitudes,	174
„ XII. Sunspots and Sources of Cyclonic Energy,	215
„ XIII. Past and Present Climates,	245
„ XIV. The Quaternary Ice Age,	261
APPENDIX. Mean Daily Pressures and Pressure Ranges for 1929-32,	273
INDEX,	281

POSITION OF PLATES.

Aurora Borealis,	<i>Frontispiece</i>
Figs. 34, 35. Pencil Rubbings of Glacier Ice Surface showing Situation of Grains,	<i>facing page 79</i>
Fig. 56. Magnetic Lines of Force shown by Iron Filings in Magnetic Field,	<i>facing page 133</i>
Fig. 127. Stream of Sunspots, March 21, 1920,	216
