Preface	ix
Introduction	xi
Chapter 1 Conventional, Pulse-Compression, and Synthetic-Aperture Radar	1
1.1 Equations for Conventional Imaging Radar Systems	1
1.1.1 Resolution	1
1.1.2 Signal, Noise, and Clutter	3
1.2 Pulse-Compression and Synthetic-Aperture Processing	5
1.2.1 Pulse Compression	6
1.2.2 SAR Processing	8
1.2.3 Signal, Clutter, and Noise	16
1.3 Geometric Performance of the Synthetic-Aperture Radar	25
1.3.1 Resolution and Sidelobes	25
1.3.2 Geometric Fidelity	27
1.4 Numerical Example	27
1.4.1 Radar Parameters	27
1.4.2 Performance as a Conventional Radar	28
1.4.3 Performance with Coherent Signal Processing	30
References	31
Chapter 2 Electronic Warfare Against Imaging Radars	33
2.1 Electronic Warfare Definitions	33
2.1.1 Electronic Warfare (EW)	33
2.1.2 Electronic Warfare Support Measures (ESM)	33
2.1.3 Electronic Countermeasures (ECM)	34
2.1.4 Electronic Counter-Countermeasures (ECCM)	35
2.1.5 Radar Reconnaissance	35
2.2 Electronic Countermeasures	35
2.2.1 Signal, Thermal Noise, and Jammer Noise Spectra	36

2.2.2	Jammer Effectiveness	40
2.3	Jamming of Data-Linked Signals	48
2.4	Electronic Counter-Countermeasures	48
2.4.1	General	48
2.4.2	Radar Signal Intercept	49
2.4.3	Radar Signal Classification	52
2.4.4	Jammer Noise Reduction	53
	References	57
Chapter 3	Electronic Warfare Effectiveness Measure	59
3.1	Contour Plot Concept	59
3.1.1	General	59
3.1.2	Intercept Contour Values	62
3.1.3	Jamming	62
3.2	Generating Contour Plots	64
3.2.1	General	64
3.2.2	Antenna Patterns	64
3.2.3	Coordinate System	65
3.2.4	Special Case: Jammer Offset Equals Boresight Intercept	65
3.3	Evaluation Procedure	67
3.4	Simulated Jammer Noise and Evaluation	68
3.4.1	Geometric Evaluation	68
3.4.2	Scatterometric Evaluation	70
3.5	Numerical Example	70
3.5.1	Susceptibility to Intercept	70
3.5.2	Vulnerability to Jamming	71
3.5.3	Along-Track Distance of Effective Jamming	73
3.5.4	ECCM	73
3.5.5	Burst Mode	77
	List of Symbols	77
	Index	81
