

TABLE OF CONTENTS

INTRODUCTION	11
COMPUTER ARCHITECTURE	
1.1. Machine Data Representation	18
1.1.1. Positional Numeral Systems.....	18
1.1.2. Binary System	21
1.1.3. Hexadecimal system.....	24
1.1.4. The Representation of Integers	25
1.1.5. The Representation of Real Numbers	30
1.1.6. Alphanumeric Representation	32
1.1.7. Representation of Graphics.....	37
1.2. Design and Operation of a Computer System.....	39
1.2.1. Classification of Computer Systems	39
1.2.2. The Classic Model of a Computer System	42
1.2.3. Main Memory	43
1.2.4. The Processor	44
1.3. Intel x86 Processor Architecture	46
1.3.1. x86 Memory Organisation and Operation	47
1.3.2. Registers	52
1.3.3. Processor Instructions.....	57
1.3.4. Stack Design and Operation	62
1.3.5. Hardware and Software Interrupts	64
1.3.6. Input/Output Device Port Management.....	69
1.3.7. DEBUG Program.....	71
1.3.8. x86 Assembly Language Programming.....	74
BIBLIOGRAPHY	80

OPERATING SYSTEMS

2.1. Origin, History and Operating System Objectives	83
2.1.1. Early Computers.....	83
2.1.2. Development of Operating Systems Concepts.....	84
2.1.3. Layered Operating System Model	85
2.1.4. Types of Operating Systems.....	86
2.2. Processes and CPU Allocation Planning	87
2.2.1. Process Concept:.....	87
2.2.2. Process Control Block	92
2.2.3. Context Switching – Single Processor Multitasking.....	93
2.2.4. Process Scheduling.....	95
2.2.5. Scheduling Queues	96
2.3. Process Concurrency and Synchronisation	97
2.3.1. Process Tree in the System.....	97
2.3.2. Process Creation – Parent and Child Process	98
2.3.3. Process Cooperation and Synchronisation	100
2.3.4. Multiprogramming – Job Scheduling Strategies	101
2.3.5. Threads versus Processes	103
2.3.6. Process Coordination – Deadlocks and Counter-Measures	105
2.3.7. Interprocess Communication.....	111
2.4. Main Memory Management – Virtual Memory	113
2.4.1. Basic Problems.....	113
2.4.2. Virtual Memory Concept.....	119
2.5. File Systems	123
2.5.1. External Memory, a.k.a. Mass Storage	123
2.5.2. FAT File Systems.....	128
2.5.3. NTFS System	131
2.6. Principles of Operating I/O Devices.....	132
2.6.1. Input-Output Device Types.....	132
2.6.2. I/O Mechanism Structure and Accessories	133
BIBLIOGRAPHY	136

COMPUTER NETWORKS

3.1. The Origin and Development of Computer Networks.....	139
3.2. Computer Network Definition and Most Important Classifications	140
3.3. Standards and Layered Models of Computer Networks.....	142
3.3.1. Standards Organisations.....	142
3.3.2. OSI Model by ISO	143
3.3.3. LAN	150
3.3.4. Network Topologies.....	151
3.4. LAN Technologies	153
3.5. WAN Technologies	155
3.6. Selected Aspects of Data Transmission in Physical Networks.	157
3.7. TCP/IP and Other Logical Networks.....	160
3.8. IP Network Addressing.....	163
3.8.1. Organisation and Coordination of IP Address Allocation.....	163
3.8.2. IP Addressing Principles.....	165
3.8.3. Network Mask (IPv4)	167
3.8.4. IP Network Address (IPv4)	168
3.8.5. IPv6 versus IPv4	169
3.9. TCP/IP Network Routing	172
3.9.1. Routing Protocols	173
3.9.2. Distance Vector Routing.....	174
3.9.3. Link State Routing	176
3.9.4. Hybrid Routing.....	177
3.9.5. Static Routing	178
3.9.6. TCP/IP Network Routing Protocols	178
3.9.7. Classful Protocols.....	178
3.9.8. Protocol Selection	181
3.9.9. Routing Information Protocol.....	182
3.9.10. RIP Version 2	184
3.9.11. Interior Gateway Routing Protocol.....	187

3.9.12. Enhanced Interior Gateway Routing Protocol.....	189
3.9.13. Open Shortest Path First Protocol.....	190
3.9.14. IS-IS Protocol	193
3.9.15. Static Routing	193
3.9.16. Preventing Loops.....	195
3.9.17. Redistribution of Routing Data.....	196
3.9.18. A Few Words on the Internet.....	197
3.9.19. Internet and Wide Area Networks	197
3.9.20. Internet Access in xDSL Technology	199
3.9.21. ADSL Uses.....	201
3.9.22. POTS and ADSL	202

BIBLIOGRAPHY	203
---------------------------	------------

COMPUTER SYSTEM ADMINISTRATION

4.1. System Administration Tasks	207
4.1.1. General Principles of Network Management.....	207
4.1.2. Network Management Architecture	207
4.1.3. ISO Network Management Model	208
4.2. Setup, Configuration and Tuning of a Computer System.....	210
4.2.1. Business Criteria for Proper System Configuration	210
4.2.2. Installation and Configuration of Multiple Systems on a Single Disk.....	213
4.3. Automation of System Administration Tasks and Remote Administration.....	213
4.3.1. Automation of Administrative Tasks.....	213
4.3.2. System Scripts.....	214
4.3.3. Remote Management	216
4.4. System Resource Administration Tools	225
4.5. Directory Services	226
4.5.1. The Use of Directory Services	227
4.5.2. Standards	228
4.5.3. Types of Directory Services.....	230
4.5.4. Implementation of Directory Services	231

4.6. Monitoring System.....	234
4.7. Cloud Computing.....	235
4.7.1. Types of Computing Clouds	236
4.7.2. Models of Cloud Computing	236
4.7.3. Colocation	236
4.7.4. IaaS (Infrastructure as a Service).....	237
4.7.5. PaaS (Platform as a Service)	237
4.7.6. SaaS (Software as a Service)	237
