

CONTENTS

Preface

Section 1 – Introduction 1

E. Bovio, H. Schmidt

The GOATS joint research project: underwater vehicle networks for acoustic and oceanographic measurements in the littoral ocean. 3

Section 2 – Autonomous Ocean Sampling Networks (AOSN) 17

Technology

J. Bellingham

Autonomous Ocean Sampling Networks – a mobile, adaptive observatory concept. 19

J.E. Manley

Developments in ODYSSEY II Class AUVs for the GOATS 2000 Joint Research Project. 49

E. An, S. Smith, S. Dunn, T. Pantelakis, W. Whitley, J. Frankenfield, J. Kuntz, A. Burns, R. Christensen

OCEAN EXPLORER AUV participation in the GOATS 2001 experiment. 61

J. Vaganay, B. Jouvencel, P. Baccou, V. Creuze

The odyssey of TAIPAN exploring the ocean at GOATS 2000. 70

N. Toumelin, J. Lemaire

New capabilities of the REDERMOR unmanned underwater vehicle. 91

R. Tyce, F de Strobel, V. Grandi, L. Gualdesi, S. Fioravanti

Trawl-safe profiler development at SACLANT centre for shallow water environmental assessment and real time modeling. 99

P. Sletner, L. Gualdesi, R. Chiarabini

Shore laboratory in support of GOATS 111

A. Berni, P. Franchi.

Networking in support of the GOATS JRP. 121

S. Willcox, J. Vaganay, R. Grieve, J. Rish

The Bluefin BPAUV: an organic wide-area bottom mapping and mine-hunting vehicle. 127

Section 3 – Geographical Information Systems (GIS)	143
<i>F. Spina, G. Cimino</i> Networked GIS database for GOATS.	145
<i>F. Askari, P. Franchi, E. Malaret</i> The SACLANTCEN Fusion Centre.	153
<i>Y. Pétillet, K. Lebart, A. Cormack, D. Lane</i> <i>SEETRACK</i> , a system for post mission analysis of AUV data products.	159
Section 4 – Navigation	169
<i>O.K. Hagen, P.E. Hagen</i> Terrain referenced integrated navigation system for underwater vehicles.	171
<i>R..R. Beckman, A. B. Martinez, B.S. Bourgeois</i> LOST2: results from GOATS 2000.	181
<i>J.J. Leonard, P.M. Newman, J.W. Fenwick, R.J. Rikoski</i> Concurrent mapping and localization for multiple autonomous underwater vehicles.	191
Section 5 – Rapid Environmental Assessment (REA)	201
<i>F. Askari, S. Scevenels</i> High resolution wind mapping with RADARSAT during GOATS 2000.	203
<i>F.H. Vink, R. Hollett, B. Zerr</i> Towards bottom classification with AUVS: segmentation of sidescan sonar imagery using an unsupervised artificial network.	209
<i>S. Reed, J. Bell, Y. Pétillet</i> Unsupervised segmentation of object shadow and highlight using statistical snakes.	221
<i>F. Spina, E. Bovio, G. Canepa</i> Seafloor classification for MCM with AUV mounted sensors.	237

Section 6 – Multi-scale Environmental Assessment Network Studies (MEANS)	247
<i>A.R., Robinson, J. Sellschopp, W.G. Leslie, A. Alvarez, G. Baldasserini, P.J. Haley, P.F.J. Lermusiaux, C. Lozano, E. Nacini, R. Onken, R. Stoner, P. Zanasca</i>	249
Forecasting synoptic transients in the Eastern Ligurian Sea.	
<i>L.H. Kantha, S. Carniel, P. Franchi</i>	
Development of a real-time nowcast/forecast system for the Ligurian sea: the GOATS-MEANS 2000 experiment.	275
<i>A. Alvarez, A. Caiti</i>	
Path planning of autonomous underwater vehicles in ocean environments with complex spatial variability.	289
Section 7 – Mine Countermeasures (MCM)	299
<i>M. Pinto, A. Bellettini, R. Hollett, A. Tesei</i>	
High resolution imaging of buried targets.	301
<i>B. Zerr, E. Bovio, B. Stage</i>	
Automatic mine classification approach based on AUV manoeuvrability and COTS side scan sonar.	315
<i>E. Durà, D Lane, J. Bell</i>	
Automatic 3D reconstruction of mine geometries using multiple side scan sonar images.	323
<i>J.R. Edwards, H. Schmidt, K.D. Lepage</i>	
Synthetic aperture processing of GOATS'98 bistatic acoustic data.	333
<i>K.D. Lepage, Henrik Schmidt</i>	
Bistatic synthetic aperture imaging of proud and buried targets from an AUV.	343
<i>H. Schmidt</i>	
Bistatic scattering from buried targets in shallow water.	361
