

CONTENTS

Chapter 1. NAVIGATION BY RADIO

	PAGE
1·0 Pre-war systems	1
1·1 Wartime developments	1
1·2 Instrument landing	2

Chapter 2. PRE-WAR RADIO NAVIGATIONAL SYSTEMS AND THEIR LIMITATIONS

2·0 Introduction	4
2·1 Medium-frequency d.f.	4
2·2 The d.f. loop	4
2·3 The radio compass	4
2·4 Medium-frequency ground beacons	5
2·5 Ground medium-frequency d.f.	6
2·6 High-frequency d.f.	6
2·7 Rotating beacons	7
2·8 Some wartime developments of c.w. beacon systems	7
2·9 Radio track guides	8

Chapter 3. SHORT-RANGE NAVIGATIONAL AIDS—RADAR INTERROGATORS AND RESPONDER BEACONS

3·0 Introduction of responder beacons for use with radar	10
3·1 Introduction of an independent interrogator-responder navigational system	11
3·1·1 Method of operation of interrogator-responder beacon system	12
3·2 A.S.V. and A.I. beacons	14
3·3 Lucero	18
3·4 Rebecca/Eureka	19
3·4·1 Eureka beacons	21
3·5 Meter display for interrogators	22
3·6 Microwave beacons	23
3·7 U.N.B. (United Nations Beacons)	23

Chapter 4. SHORT-RANGE NAVIGATIONAL AIDS—V.H.F./D.F.

	PAGE
4.0 Introduction	25
4.1 Ground d.f. aerials	25
4.2 Siting and accuracy	27
4.3 Operational use	28
4.4 Future developments	28
4.5 Use in transport flying and civil aviation	29

Chapter 5. V.H.F. RANGES

5.0 Two-course v.h.f. visual ranges	30
5.1 V.h.f./B.A. as a range	30
5.2 Two-course radar range	30
5.3 V.h.f. omni-directional range	31
5.4 Omni-directional radar range	32

Chapter 6. GEE

6.0 Introduction	34
6.1 Fundamental principles of Gee	35
6.2 A Gee chain	38
6.3 Airborne display	38
6.4 Accuracy of Gee	43
6.5 The airborne equipment	45
6.6 The ground stations	46
6.6.1 The Master station	46
6.6.2 The Slave stations	47
6.6.3 The Monitor station	47
6.7 Operational use of Gee	48
6.7.1 Gee and the invasion	49
6.8 The future of Gee	49

Chapter 7. LONG-RANGE NAVIGATIONAL AIDS—LORAN

7.0 Problems of long-range radio aids to navigation	51
7.1 H.f. Loran	51
7.1.1 Accuracy of h.f. Loran	53
7.1.2 Coverage and operational use of Loran	54

7·2	Loran equipment	56
7·3	Civil use of Loran	56
7·4	S.S. Loran	57
7·5	Future uses of Loran	58
7·6	L.f. Loran	59

*Chapter 8. LONG-RANGE NAVIGATIONAL AIDS—
C.W. SYSTEMS*

8·0	Introduction	60
8·1	Sonne or Consol	60
8·1·1	Accuracy of Consol by day and by night	63
8·1·2	Coverage of Consol	64
8·1·3	Operational use of Consol	64
8·1·4	Siting of Consol	64
8·2	The P.O.P.I. navigation system	65
8·2·1	Method of operation	66
8·2·2	Properties of the system	67
8·3	The Decca navigation system	67
8·3·1	Method of operation	68
8·3·2	Operational use	69
8·4	Comparison of various c.w. systems	69

Chapter 9. MICROWAVE RADAR NAVIGATIONAL AIDS

9·0	Introduction	71
9·1	H ₂ S	71
9·2	Method of operation	73
9·3	The use of 3 cm.	73
9·4	Future use of microwave radar for navigation	74
9·5	Navigational computers	75
9·6	Marine navigation	75

Chapter 10. SPECIAL RADAR APPLICATIONS

10·0	Introduction	77
10·1	G.H.	77
10·1·1	Accuracy of G.H.	78
10·1·2	Application of G.H. to survey and to aerial photography	79

	PAGE
10·2 Rebecca-H	80
10·3 Shoran	80
10·4 Oboe	81
10·4·1 Use of Oboe for survey	82
10·5 German beam systems	82

Chapter II. RADIO ALTIMETERS

11·0 Introduction	84
11·1 Development of radio altimeters	85
11·2 Frequency-modulation altimeters	86
11·2·1 The A.Y.D. altimeter	86
11·2·2 The A.Y.F. altimeter	86
11·2·3 German altimeter	86
11·3 10 cm. altimeter	87
11·4 Pulse altimeters	87
11·5 Operational use of radio altimeters	88

Chapter 12. AIDS TO INSTRUMENT LANDING—C.W. SYSTEMS

12·0 Introduction	90
12·1 S.B.A.	90
12·2 V.h.f./B.A.	91
12·3 Standard Telephones and Cables glide path	92
12·4 S.C.S. 51	93
12·5 Limitations of S.C.S. 51	95
12·6 Use with automatic pilot	95

Chapter 13. AIDS TO INSTRUMENT LANDING— RADAR SYSTEMS

13·0 B.A.B.S.	96
13·1 B.A.B.S. Mark II	97
13·2 B.A.B.S. beacon	98
13·3 B.A.B.S. aerial system	98
13·4 Airborne display	98
13·5 Meter display of B.A.B.S. information	100
13·6 Use of B.A.B.S. with automatic pilots	101
13·7 Limitation of the B.A.B.S. system	101
13·8 Future outlook	102
13·9 Use of ground radar for instrument landing	102

Chapter 14. AIRFIELD CONTROL

	PAGE
14.0 Introduction	103
14.1 Use of short-range navigational aids for airfield control	104
14.2 Airfield control radar (A.C.R.)	104
14.3 Surface movement	105

Chapter 15. REVIEW OF NAVIGATIONAL SYSTEMS

15.0 Short-range aids to navigation	106
15.1 Medium-range navigational aids	107
15.2 Long-range navigational aids	107
15.3 Instrument landing	108
15.4 Co-ordination of radio systems in aircraft	109
GLOSSARY	111
INDEX	113

ERRATA
