DP1 – PART ANALYSIS – LEVER ARM	91
KEY FEATURES AND WORKFLOWS INTRODUCED IN THIS DESIGN PROBLEM	91

CONTENTS

<i>Pin Constraint</i>	91
<i>Bearing Load</i>	91
<i>Basic Mesh Settings</i>	91
<i>Global and Local Face Mesh Control</i>	91
<i>Results Convergence – Manual Mesh Sensitivity Study</i>	91
<i>Safety Factor Result Plots</i>	91
<i>Redesign</i>	91
INTRODUCTION	92
WORKFLOW OF DESIGN PROBLEM 1	93
<i>Idealization</i>	93
<i>Boundary conditions</i>	94
<i>Run simulation and analyse</i>	98
<i>Redesign – Reduce weight</i>	104
DP2 – PART ANALYSIS – PROP SHAFT YOKE	107
KEY FEATURES AND WORKFLOWS INTRODUCED IN THIS DESIGN PROBLEM	107
<i>Fixed Constraint</i>	107
<i>Moment Load</i>	107
<i>Rigid Body Connector</i>	107
<i>Advanced Mesh Settings</i>	107
<i>Global and Local Face Mesh Control</i>	107
<i>Nodal and Centroidal Results</i>	107
<i>Stress Singularities</i>	107
<i>Section View Plot</i>	107
INTRODUCTION	108
WORKFLOW OF DESIGN PROBLEM 2	109
<i>Idealization</i>	109
<i>Boundary conditions</i>	110
<i>Run simulation and analyse</i>	114
DP3 – ASSEMBLY ANALYSIS – LEVER	121
KEY FEATURES AND WORKFLOWS INTRODUCED IN THIS DESIGN PROBLEM	121
<i>Fixed Constraint</i>	121
<i>Frictionless Constraint</i>	121
<i>Bearing Load</i>	121

<i>Symmetry Conditions</i>	121
<i>Automatic Contacts</i>	121
<i>Advanced Mesh Settings</i>	121
<i>Global and Local Face Mesh Control</i>	121
<i>Display full model results from a half symmetry model</i>	121
INTRODUCTION.....	122
WORKFLOW OF DESIGN PROBLEM 3.....	123
<i>Idealization</i>	123
<i>Boundary conditions</i>	124
<i>Run simulation and analyse</i>	128
DP4 – ASSEMBLY ANALYSIS – BOLTED BRIDGE STRUCTURE	133
KEY FEATURES AND WORKFLOWS INTRODUCED IN THIS DESIGN PROBLEM	133
<i>Fixed Constraints</i>	133
<i>Frictionless Constraints</i>	133
<i>Symmetry Conditions</i>	133
<i>Bolt Connectors</i>	133
<i>Manual Contacts</i>	133
<i>Global and Local Face Mesh Control</i>	133
<i>Part Mesh Control</i>	133
<i>Bolts Results Processing</i>	133
