I	Local Operations: Edging	1
1.1	Basic Definitions	4
1.2	Gradient Filter	5
1.3	Approximation of the Gradient Filter	8
1.4	Roberts Operator	12
1.5	Gradient Image Thresholding	13
1.6	Sobel Operator	14
1.7	Prewitt Operator	16
1.8	Frei & Chen Operator	16
1.9	Comparison of LED Operators	16
1.10	Directional Gradient Operator	22
1.11	Gaussian Derivative Operator (DroG)	24
1.12	Laplacian Operator	26
1.13	Laplacian of Gaussian (LoG)	30
1.14	Difference of Gaussians (DoG)	37
1.15	Second-Directional Derivative Operator	38
1.16	Canny Edge Operator	39
1.16.1	Canny Algorithm	44
1.17	Point Extraction	47
1.18	Line Extraction	47
1.19	High-Pass Filtering	48
1.19.1	Ideal High-Pass Filter (IHPF)	49
1.19.2	Butterworth High-Pass Filter (BHPF)	50
1.19.3	Gaussian High-Pass Filter (GHPF)	52
1.20	Ideal Band-Stop Filter (IBSF)	52
1.20.1	Butterworth and Gaussian Band-Stop Filter	54
1.21	Band-Pass Filter (BPF)	54
1.21.1	Ideal Band-Pass Filter (IBPF)	55
1.21.2	Butterworth and Gaussian Band-Pass Filter	55
1.21.3	Difference of Gaussian Band-Pass Filter	56
1.21.4	Laplacian Filter in the Frequency Domain	57

1.22	Sharpening Filters	58
1.22.1	Sharpening Linear Filters	58
1.22.2	Unsharp Masking	60
1.22.3	Sharpening High-Boost Filter	62
1.22.4	Sharpening Filtering in the Frequency Domain	64
1.22.5	Homomorphic Filter	64
	References	67
2	Fundamental Linear Transforms	69
2.1	Introduction	69
2.2	One-Dimensional Discrete Linear Transformation	70
2.2.1	Unitary Transforms	70
2.2.2	Orthogonal Transforms	70
2.2.3	Orthonormal Transforms	71
2.2.4	Example of One-Dimensional Unitary Transformation	72
2.3	Two-Dimensional Discrete Linear Transformation	73
2.3.1	Example of a Two-Dimensional Unitary Transformation	74
2.4	Observations on Unitary Transformations	74
2.4.1	Properties of Unitary Transformations	76
2.5	Sinusoidal Transforms	77
2.6	Discrete Cosine Transform (DCT)	78
2.7	Discrete Sine Transform (DST)	82
2.8	Discrete Hartley Transform (DHT)	82
2.9	Transform with Rectangular Functions	84
2.9.1	Discrete Transform of Hadamard—DHaT	84
2.9.2	Discrete Transform of Walsh (DWHT)	89
2.9.3	Slant Transform	91
2.9.4	Haar Transform	93
2.10	Transform Based on the Eigenvectors and Eigenvalues	95
2.10.1	Principal Component Analysis (PCA)	98
2.10.2	PCA/KLT for Data Compression	103
2.10.3	Computation of the Principal Axes of a Two- Dimensional Object	109
2.10.4	Dimensionality Reduction	109
2.10.5	Calculation of Significant Components in Multispectral Images	111
2.10.6	Eigenface—Face Recognition	114
2.11	Singular Value Decomposition SVD Transform	120
2.12	Wavelet Transform	123
2.12.1	Continuous Wavelet Transforms—CWT	125
2.12.2	Continuous Wavelet Transform—2D CWT	127

2.12.3	Wavelet Transform as Band-pass Filtering	128
2.12.4	Discrete Wavelet Transform—DWT	129
2.12.5	Fast Wavelet Transform—FWT	131
2.12.6	Discrete Wavelet Transform 2D—DWT2	134
2.12.7	Biorthogonal Wavelet Transform	139
2.12.8	Applications of the Discrete Wavelet Transform	140
2.13	Summary of the Chapter	145
	References	146
3	Geometric Transformations	149
3.1	Introduction	149
3.2	Homogeneous Coordinates	149
3.3	Geometric Operator	151
3.3.1	Translation	154
3.3.2	Magnification or Reduction	154
3.3.3	Rotation	155
3.3.4	Skew or Shear	155
3.3.5	Specular	156
3.3.6	Transposed	156
3.3.7	Coordinate Systems and Homogeneous Coordinates	156
3.3.8	Elementary Homogeneous Geometric Transformations	157
3.4	Geometric Affine Transformations	160
3.4.1	Affine Transformation of Similarity	161
3.4.2	Generalized Affine Transformation	161
3.4.3	Elementary Affine Transformations	163
3.5	Separability of Transformations	166
3.6	Homography Transformation	167
3.6.1	Applications of the Homography Transformation	172
3.7	Perspective Transformation	174
3.8	Geometric Transformations for Image Registration	177
3.9	Nonlinear Geometric Transformations	178
3.10	Geometric Transformation and Resampling	181
3.10.1	Ideal Interpolation	184
3.10.2	Zero-Order Interpolation (Nearest-Neighbor)	189
3.10.3	Linear Interpolation of the First Order	190
3.10.4	Biquadratic Interpolation	192
3.10.5	Bicubic Interpolation	194
3.10.6	B-Spline Interpolation	197
3.10.7	Interpolation by Least Squares Approximation	200
3.10.8	Non-polynomial Interpolation	201
3.10.9	Comparing Interpolation Operators	202
