

## CONTENTS.

1. General remarks on ship stability - - - - -	9
2. Stability of modern vessels and oil fuel - - - - -	10
3. Past methods of dealing with ship stability - - - - -	11
4. Stability terms - - - - -	12
5. The vertical centre of gravity (definition) - - - - -	13
6. The vertical centre of buoyancy - - - - -	14
7. The transverse metacentre - - - - -	15
8. The manner in which the forces of weight and buoyancy govern ship stability - - - - -	17
9. Stability data to be supplied to British built ships - - - - -	24
10. Stability data for an ordinary cargo steamer - - - - -	24
11. The vertical centre of gravity (data) - - - - -	25
12. Table or curve of transverse metacentre - - - - -	26
13. Calculated G.M. for several conditions of loading - - - - -	26
14. Showing distribution of deadweight - - - - -	26
15. Specimen calculation for ascertaining the G.M. - - - - -	27
16. Stability curves - - - - -	27
17. Correcting a stability curve for a change in the G.M. - - - - -	30
18. Effect of free liquid surfaces on the G.M. - - - - -	32
19. The manner in which free liquid surfaces affect the G.M. - - - - -	33
20. Formulae for calculating the effect of free liquid surfaces on the G.M. - - - - -	35
21. Running water into an empty hold; effect on G.M. - - - - -	36
22. Free liquid surfaces for deep tanks - - - - -	37
23. Non-divided double bottom tanks and the G.M. - - - - -	37

24. Removing liquid from a full double bottom tank has a double effect on the G.M. - - - - -	38
25. Capacity plan of the vessel to be graduated vertically in feet - - - - -	38
26. How to use stability data - - - - -	39
27. Stability for a ballast voyage - - - - -	40
28. G.M. at the end of a ballast voyage - - - - -	41
29. Stability with a case-oil cargo - - - - -	41
30. Case-oil cargo—Stability at the end of a voyage - -	43
31. Calculating the G.M. - - - - -	43
32. Calculating the G.M. for a vessel loaded with general cargo - - - - -	44
33. Effect of freeboard on stability - - - - -	45
34. Stability of vessels of unusual design - - - - -	46
35. Minimum G.M. for sea-going condition - - - - -	47
36. How to deal with the stability of ships not provided with data - - - - -	49
37. How to find the approximate vertical centre of gravity	50
38. Estimated height of a cargo vessel's centre of gravity	50
39. Error in ship's estimated centre of gravity - - -	52
40. How to make a table of approximate transverse meta-centres - - - - -	53
41. Symptoms indicating an unstable or tender ship - -	56
42. How to deal with an unstable ship - - - - -	57
43. Appliances for ascertaining the G.M. - - - - -	60
44. The inclining experiment - - - - -	65
45. Stability of a ship with heavy lift suspended outboard	75
46. Ship trim - - - - -	78
Questions - - - - -	82
