

Table of contents

Introduction	11
--------------------	----

THEORETICAL FOUNDATIONS OF PROGRAMMING

1.1. Basics of algorithmics.....	17
1.2. The history of algorithms and the concept of recursion.....	27
1.3. The concept of a Turing machine	28
1.4. A finite automaton.....	30
1.5. Automaton with variable states – a sequential system	32
1.6. Formal languages and grammars.....	35
1.7. Automata and grammars	38
1.8. A few additional comments on grammars and languages.....	40
1.9. Properties of Turing machines.....	42
1.10. An example of the construction of a Turing machine and its operation	44
1.11. Bibliography.....	47

PRACTICE OF IMPERATIVE STRUCTURED PROGRAMMING

2.1. Programming paradigms	51
2.2. Java programming language	51
2.2.1. Program development	53
2.2.2. Compiling and running the program	53
2.2.3. Runtime environment	55
2.2.4. Conventions applied	56
2.2.5. Input and output.....	57

2.3. Data types, variables and operators.....	57
2.3.1. Data types	57
2.3.2. Literals	58
2.3.3. Constants and variables	59
2.3.4. Operators	61
2.3.5. Type conversion and casting	62
2.3.6. Character strings	63
2.3.7. Arrays	65
2.3.8. Enumerated type	67
2.4. Controlling the flow of execution of the program	67
2.4.1. Statement block.....	68
2.4.2. Conditional statement.....	68
2.4.3. Multiple choice statement.....	71
2.4.4. Indefinite loops	73
2.4.5. Definite loops.....	75
2.4.6. Interrupting the control statement.....	78
2.5. Program decomposition	78
2.5.1. Primitive and class type variables	79
2.5.2. Creating and deleting objects	80
2.5.3. Creating and calling methods	81
2.5.4. Using library classes	87
2.5.5. Wrapper classes.....	89
2.6. Questions	90

OBJECT-ORIENTED PROGRAMMING PARADIGM

3.1. Basic concepts	95
3.1.1. Definition of a class	95
3.1.2. Creating objects	98
3.1.3. Components of a class.....	99
3.2. Composition and inheritance.....	106
3.2.1. Composition	107
3.2.2. Inheritance.....	110
3.2.3. Polymorphism.....	113

3.2.4. Packages.....	115
3.2.5. Additional concepts	118
3.3. Interfaces and abstract classes.....	118
3.3.1. Interfaces.....	119
3.3.2. Abstract classes and methods	123
3.3.3. Final classes and methods	125
3.4. Streams, files and error handling.....	126
3.4.1. Exceptions and their structure	127
3.4.2. Handling exceptional situations	129
3.4.3. Data streams	132
3.4.4. Files and directories	136
3.5. Graphical User Interface	138
3.5.1. Main application window	138
3.5.2. Containers and components	139
3.5.3. Event handling.....	144
3.5.4. Graphic elements	150
3.6. Applets	152
3.7. Questions	156
3.8. Bibliography.....	158

PROGRAMMING OF MOBILE DEVICES

4.1. Rules for creating mobile sites	163
4.1.1. Definition and content of a Webpage	164
4.1.2. Creating navigation and references.....	167
4.1.3. Interaction with the user	168
4.1.4. Testing the Website	168
4.2. Introduction to the development of mobile applications.....	169
4.3. User interface.....	173
4.3.1. High-level interface.....	173
4.3.2. Program information	178
4.3.3. Graphical User Interface	181
4.3.4. Uniform user interface	186

4.4. Methods of communication with the surroundings	189
4.4.1. Establishing and closing connections.....	190
4.4.2. Multithreading	191
4.4.3. Practical implementation of communication	192
4.4.4. Sending and receiving text and binary messages	195
4.4.5. Sending and receiving multimedia messages	196
4.4.6. Programmed message receipt	199
4.5. Saving and loading data	202
4.5.1. Record Management System	203
4.5.2. Practical use of the RMS capabilities	205
4.6. Questions	208
4.7. Bibliography.....	209

ALGORITHMS AND DATA STRUCTURES

5.1. Complexity of algorithms	213
5.1.1. Complexity classes.....	213
5.1.2. Determining the computational complexity of an algorithm.....	216
5.2. Recursion and its applications.....	218
5.3. Array algorithms	226
5.3.1. Inversion of elements in a vector.....	226
5.3.2. Sieve of Eratosthenes	228
5.3.3. Selection sort	229
5.3.4. Insertion sort	230
5.3.5. Bubble sort.....	231
5.3.6. Quick sort.....	232
5.3.7. Merge sort.....	234
5.4. Combinatorial algorithms.....	236
5.4.1. Combinations without repetition	236
5.4.2. Permutations without repetition	237

5.5. Dynamic structures	239
5.5.1. Sets and their implementation.....	239
5.5.2. List structures.....	247
5.5.3. An associative array.....	255
5.5.4. Trees.....	259
5.5.5. Graphs.....	266
5.6. Bibliography	269
List of tables	271
List of pictures	271
