

Table of contents

Preface	IX
Organization	XIII
1 Simulation	
1.1 Safety in navigation	
Twenty years of marine simulator (CAORF) operations: Lessons learned during these years <i>H.EDA, F.E.Guest & J.J.Puglisi</i>	3
Effective representation of light aids to navigation in ship handling simulator <i>M.Numano</i>	13
Safety analysis for the Port of Barcelona (flammable products basin) using a real time manoeuvring simulator <i>J.R.Iribarren, J.M.Montero & I.Garcia-Carrasco</i>	21
1.2 Navigation technology	
The simulation of tug operations in a multiple simulator environment <i>B.K.Jakobsen, E.R.Miller, J.H.Wulder & H.Hensen</i>	29
The potential application of virtual reality based simulators to shiphandling and marine operations <i>E.R.Miller, M.Fitch & R.Castillo</i>	39
A study on a support of decision-making for collision avoidance in INS <i>Y.Ishioka, K.Kose, H.Kobayashi, C.Yang, S.Nakamura & H.Yamada</i>	49
A multi vessel training system for high speed craft <i>A.S.Christensen & P.Schjeldal Jensen</i>	59
1.3 Curriculum/training	
The need for improved curriculum development in marine simulation training <i>P.Barber</i>	77

Inland waterways training using simulation piloting <i>L.L.Daggett</i>	89
A study of trainees' learning attitudes towards shiphandling simulator training <i>D.-L.Fang</i>	97
Simulator time and its sea time equivalence (phase I and II) <i>J.H.Wulder, J.M.C.Schraagen, M.van Hattem & F.L.A.Bloot</i>	109
Instruction, training and expertise advancement of pilots: The key elements in obtaining the highest possible quality of certified pilots in the Netherlands <i>H.A.Dijkhuizen, P.den Butter & B.R.Koning</i>	125
Methodology for bridge simulator skills assessment <i>S.J.Cross</i>	145
1.4 Human factors/design	
Keynote lecture: Human factors and ergonomics for maritime safety <i>N.Moray</i>	155
Development of harbor capability assessment simulation system by the application of fuzzy algorithm <i>I.-Y.Gong, Y.-G.Kim, C.-M.Lee, J.-W.Kim & H.-J.Lee</i>	161
A statistical study of mariners' behaviour in collision avoidance at sea <i>J.Zhao, W.G.Price, P.A.Wilson & M.Tan</i>	169
Cognitive aspects of the captain's work in a critical situation <i>T.Clemmensen</i>	177
Beyond bridge resource management: The risk management culture of the U.S. Coast Guard <i>W.E.Hanson</i>	191
1.5 Full mission and PC simulators	
Insurance and simulation: The next accident that does not happen could be yours <i>P.Pols & S.Aggevall</i>	203
Computer system of simulation of ship's motion <i>Z.Kitowski, J.Garus, B.Żak</i>	213
Full integration simulation using both engine room and bridge simulators, design and experiences <i>M.J.van der Marel, F.S.H.Verkerk & M.Harms</i>	221
Applying prototype ship transit data to simulator validation <i>D.W.Webb & R.T.Wooley</i>	225
The selection and training of simulator instructors <i>J.D.Douglas</i>	237

1.6 The STCW Convention

Simulation and the revised 1978 STCW Convention <i>D.F.Drown</i>	245
The revised STCW Convention and the new simulator performance standards: Some implications for simulator designers, operators and instructors <i>P.M.Muirhead</i>	257
An analysis of marine simulator instructors qualifications and training needs <i>R.M.Mercer & D.Sharpe</i>	267
The role of simulators and the qualifications of instructors and assessors under the STCW Convention <i>M.L.Barnett</i>	275
STCW 1995 redemption or receivership <i>C.R.Pillsbury</i>	285

2 Manoeuvring

2.1 Manoeuvring standards

Assessment of ship manoeuvrability based on IMO resolution No. A.751 <i>C.-G.Kang & J.-H.Kim</i>	293
On ship manoeuvrability estimation based on IMO resolution No. A.751(18) <i>E.Nikolaev, T.Inutina & M.Lebedeva</i>	303
A classification society's experience with IMO resolution No. A.751(18) <i>A.E.Raestad</i>	309

2.2 New technologies in manoeuvring

Shiphandling at low speed in deep and shallow water <i>K.Martinussen</i>	321
New manoeuvring sea trial system using DGPS <i>D.-J.Yum, T.-I.Lee, H.-Y.Lee & H.-W.Lee</i>	333
Development of a collision avoidance system considering the navigation plan <i>K.P.Rhee & H.J.Lee</i>	341
Ability of berthing assisted by joy stick controller <i>M.Endo, H.Kobayashi & Y.Murayama</i>	349
A study of supporting system for berthing maneuver <i>H.Kobayashi</i>	357

2.3 Prediction of hydrodynamic forces

Keynote lecture: Prediction of ship manoeuvrability: State of the art <i>M.Fujino</i>	371
--	-----

Measurements of stern flow field of a ship in oblique towing motion <i>K.Nonaka, T.Nimura, T.Haraguchi & M.Ueno</i>	389
Non-linear hydrodynamic hull forces derived from segmented model tests <i>J.P.Hoofst & F.H.H.A.Quadflieg</i>	399
On a prediction method of hydrodynamic forces acting on ship hull including the effect of hull form <i>K.Kijima, Y.Furukawa & K.Yukawa</i>	411
Calculation of manoeuvring hydrodynamic force including the effect of viscosity <i>Liu Zuyuan, Zhang Xiedong & Wu Xiuheng</i>	419
Performance of an enhanced rudder force prediction model in a ship manoeuvring simulator <i>A.F.Molland, S.R.Turnock & P.A.Wilson</i>	425
Hydrodynamic forces on a ship moving with constant rudder angle: A theoretical treatment of rudder angle test <i>H.Yasukawa, Y.Yoshimura & K.Nakatake</i>	435
 <i>2.4 Performance under special conditions</i>	
Experimental determination and modelling of restricted water effects on bulkcarriers <i>E.Laforce & M.Vantorre</i>	451
Squat predictions for manoeuvring applications <i>V.Ankudinov, L.Daggett, C.Huvall & C.Hewlett</i>	467
Hydrodynamic analysis of a ship collision accident: A triple-play scenario <i>P.Kaplan</i>	497
A neural network to identify ship hydrodynamic coefficients <i>P.Waclawek</i>	509
On the influence of speed on the manoeuvring behaviour of a container carrier <i>P.Oltmann</i>	515
 <i>2.5 Manoeuvring prediction</i>	
Further notes on the dynamic stability parameter and the prediction of manoeuvring characteristics <i>N.H.Norrbin</i>	527
Systematic approach for ship manoeuvrability prediction <i>K.Kose, W.A.Misiag & X.Xiong</i>	535
A study on the accuracy of the recent prediction technique of ship's manoeuvrability at early design stage <i>T.Ishiguro, S.Tanaka & Y.Yoshimura</i>	547
Applications of the manoeuvring prediction program SIMSUP to meet the new IMO standards <i>G.Capurro & P.Sodomaco</i>	563

Neural networks applied on identification of ship motions <i>C.Caux & P.Jean</i>	577
2.6 Mathematical modelling of ships' steering and manoeuvring behaviour	
A generalized math model for manoeuvring <i>M.S.Chislett</i>	593
Study on ship manoeuvring mathematical model in shiphandling simulator <i>Yang Yansheng</i>	607
An advanced physical-mathematical model of ship-hull hydrodynamic forces deduced from simplified vortex model during manoeuvring motion in slow speed <i>K.Karasuno & K.Maekawa</i>	617
Hydrodynamic modelling for ship manoeuvring simulation <i>J.S.Pawlowski</i>	625
Full scale measurements of a set of yaw/sway manoeuvring Q-indices <i>C.G.Biancardi, D.Cavazzi, G.Graziano & M.T.Masullo</i>	635
Author index	643
