1 Image Formation Process	1
1.1 Introduction	1
1.2 From Energy to Image	2
1.3 Electromagnetic Energy, Photons and Light	3
1.3.1 Characteristic of Electromagnetic Waves	4
1.4 The Energy of Electromagnetic Waves	7
1.5 Sources of Electromagnetic Waves	8
1.6 Light–Matter Interaction	9
1.7 Photons	10
1.8 Propagation of Electromagnetic Waves in Matter	13
1.9 The Spectrum of Electromagnetic Radiation	14
1.10 The Light	17
1.10.1 Propagation of Light	18
1.10.2 Reflection and Refraction	20
1.11 The Physics of Light	26
1.12 Energy of an Electromagnetic Wave	26
1.13 Reflectance and Transmittance	30
1.13.1 Angle of Brewster	37
1.13.2 Internal Reflection	39
1.14 Thermal Radiation	42
1.15 Photometric Magnitudes	50
1.16 Functions of Visual Luminosity	53
References	56
2 Radiometric Model	57
2.1 Introduction	57
2.2 Light Sources and Radiometric Aspects	58
2.3 Bidirectional Reflectance Distribution Function—BRDF	63
2.3.1 Lambertian Model	67
2.3.2 Model of Specular Reflectance	69
2.3.3 Lambertian–Specular Compound Reflectance Model	70
2.3.4 Phong Model	71

2.4	Fundamental Equation in the Process of Image Formation	73
