Foreword	9
Part I. Introduction	11
1. Motivation	13
2. Linear eigenvalue	14
3. Nonlinear eigenvalue	15
4. Research objectives	15
5. List of Publications	20
6. Application of Carbon Nanotubes and Quantum Dots – Future Works	21
6.1. Application of Carbon Nanotubes	21
6.2. Application of Quantum Dots	23
6.3. Future works	23
7. Literature	24
Part II. Linear eigenproblems	27
[P1] Muc, A., Banaś, A., Eigenproblems in nanomechanics, Bulletin of the Polish Academy of Sciences: Technical Sciences, 2015, 63 (3), pp. 819-825	29
[P2] Muc, A., Banaś, A., Identification of defects in carbon nanotubes, Proceedings of the 15th European Conference on Composite Materials, Venice, 2012	47
[P3] Banaś, A., Muc, A., Chwał, M., Defects in single walled carbon nanotubes (SWCNT), Key Engineering Materials, 542, pp. 7-10, 2013	55
Part III. Nonlinear eigenproblems	61
[P4] Banaś, A., Muc, A., Current problems in design of quantum dots used in semi-conductors, Key Engineering Materials, 542, pp. 1-6, 2013	63
[P5] Muc, A., Banaś, A., Kędziora, P., An analytical solution for conical quantum dots, Journal of Theoretical and Applied Mechanics, 51 (2), pp. 387-392, 2013	71
[P6] Muc, A., Banaś, A., Eigenproblems for selected nanostructures embedded in a matrix, 16th European Conference on Composite Materials, Sevilla 2014	79
[P7] Muc, A., Banaś, A., Wavelet method in numerical modeling of quantum dots embedded in a matrix, Advanced Materials Research, 2014, 849, pp. 427-434 ..	91
Abstract	101
Streszczenie	102
