Introduction	1
Prerequisites	1
Why APIs	2
Django REST Framework	4
Why this book	4
Conclusion	5
Chapter 1: Web APIs	7
World Wide Web	7
URLs	8
Internet Protocol Suite	9
HTTP Verbs	10
Endpoints	11
HTTP	12
Status Codes	15
Statelessness	15
REST	16
Conclusion	17
Chapter 2: Library Website and API	19
Traditional Django	19
First app	23
Models	25

CONTENTS

Admin	27
Views	31
URLs	32
Webpage	36
Django REST Framework	36
URLs	39
Views	40
Serializers	41
cURL	42
Browsable API	44
Conclusion	45
Chapter 3: Todo API	47
Initial Set Up	47
Models	50
Django REST Framework	54
URLs	56
Serializers	57
Views	59
Consuming the API	60
Browsable API	61
CORS	64
Conclusion	66
Chapter 4: Todo React Front-end	69
Install Node	69
Install React	71
Mock data	73
Django REST Framework + React	78
Conclusion	82

Chapter 5: Blog API	83
Initial Set Up	83
Model	84
Tests	89
Django REST Framework	91
URLs	93
Serializers	94
Views	96
Browsable API	97
Conclusion	101
Chapter 6: Permissions	103
Create a new user	103
Add log in to the browsable API	106
AllowAny	111
View-Level Permissions	113
Project-Level Permissions	115
Custom permissions	117
Conclusion	122
Chapter 7: User Authentication	123
Basic Authentication	123
Session Authentication	125
Token Authentication	127
Default Authentication	129
Implementing token authentication	130
Endpoints	134
Django-Rest-Auth	134
User Registration	140
Tokens	145

Conclusion	152
Chapter 8: Viewsets and Routers	155
User endpoints	155
Viewsets	161
Routers	163
Conclusion	168
Chapter 9: Schemas and Documentation	171
Schemas	172
Documentation	174
Django REST Swagger	180
Swagger Log In and Log Out	184
Conclusion	185
Conclusion	187
Next Steps	187
Giving Thanks	188
