	EXTRACT FROM PREFACE TO FIRST EDITION	Page 15
	PREFACE TO SECOND EDITION	15
<i>Chapter</i>		
I.	INTRODUCTORY	19
	1. Ship Terms.	19
	2. Symbols and Notation.	19
	3. Order of Presentation.	20
	4. Dimensions and Rules.	20
	5. Appearance.	21
II.	HULL FORM—DELINEATION AND GEOMETRY	23
	6. Definitions.	23
	7. Lines Drawing.	31
	8. Fairing the Lines.	31
	9. Sheer Line.	32
III.	THE CALCULATION OF AREAS, MOMENTS, ETC.	33
	10. Mensuration Rules.	33
	11. Trapezoidal and Mean Ordinate Rules.	34
	12. Mathematical Basis for the Simpson and Tchebycheff Rules.	35
	13. Simpson's First Rule.	36
	14. Simpson's Second Rule.	37
	15. "5 + 8 — 1" Rule.	38
	16. Durand's Rules.	38
	17. Tchebycheff's Rules.	39
	18. Half Spacing.	41
	19. Effect of "Knuckles" and End Correction.	41
	20. Choice and Accuracy of Rules.	42
	21. The Planimeter.	43
	22. The Integrator.	45
	23. The Integraph.	47
	24. The Calculation of First Moments and Moments of Inertia.	48
	25. "3 + 10 — 1" Rule for Moments.	51
	26. Radial or "Polar" Integration.	52
IV.	FLUIDS AT REST—FIRST PRINCIPLES	55
	27. Pressure Head.	55
	28. The Density of Sea Water.	56

CONTENTS

<i>Chapter</i>	<i>Page</i>
29. Total Pressure and Centre of Pressure.	56
30. Calculation of the Centre of Pressure.	58
31. Centre of Pressure on Inclined Plane.	60
32. Floating Structures—Principle of Archimedes.	61
33. Buoyancy, Pressure and Volume.	62
V. TRANSVERSE STABILITY	
34. The Metacentre and Axes of Inclination.	65
35. Heeling and Righting Moments.	66
36. Initial Stability and Metacentric Height.	67
37. Free Surface.	68
38. Inclining Experiment.	70
39. Stability at Large Angles.	71
40. Layer Correction.	72
41. Barnes' Method for Stability.	74
42. Stability by Integrator.	79
43. Cross Curves of Stability.	80
44. Alternative Methods for Transverse Stability.	82
45. Dynamical Stability.	84
VI. TRIM, LONGITUDINAL STABILITY AND ADDITION OF WEIGHTS, ETC.	
46. Principal Axes of Inclination.	85
47. Trim and Trimming Moments.	86
48. Longitudinal Metacentre.	88
49. Moment to Change Trim One Inch.	89
50. Formula for Moment to Change Trim One Inch.	90
51. The Addition of Weights.	90
52. Suspended Weights.	91
53. Movable Weights.	91
54. Stability when Grounding or Docking.	92
55. The Stability of Submarines.	93
VII. HYDROSTATIC CURVES AND THE DISPLACEMENT SHEET	
56. Displacement Calculation.	95
57. Vertical Centre of Buoyancy (V.C.B.).	95
58. Longitudinal Centre of Buoyancy (L.C.B.).	99
59. Tons Per Inch (T.P.I.).	100
60. Transverse Metacentre from Sheet.	100

CONTENTS

<i>Chapter</i>		<i>Page</i>
	61. Longitudinal Metacentre from Sheet and Centre of Flotation.	100
	62. Moment to Change Trim One Inch from Sheet.	102
	63. Change of Displacement for One Foot Change of Trim at Perpendiculars.	102
	64. The Plotting of Hydrostatic Curves.	102
	65. Morrish Formula.	104
	66. Bonjean Curves.	104
	67. Wetted Surface by Measurement.	106
	68. Wetted Surface by Formula.	106
	69. Wetted Surface of Abnormally Shallow-Draught Forms.	107
VIII.	RULES FOR FREEBOARD, SUBDIVISION AND STABILITY	108
	70. National and International Regulations.	108
	71. Load Line Markings.	108
	72. Minimum Summer Freeboard.	109
	73. Standard Sheer and Sheer Difference Correction.	111
	74. Round of Beam Correction.	112
	75. Nomenclature and Dimensions, etc., in Freeboard and Subdivision Rules.	112
	76. The Criterion of Service Numeral (C_s).	115
	77. Factor of Subdivision.	116
	78. Use of Standard Floodable Length Curve.	118
	79. Correction of Standard Curves.	119
	80. Modifications for Restricted Plying Limits.	119
	81. Permeability Interpolation Formula.	121
	82. Basic Principles and Equations for Floodable Length Curves.	121
	83. Explanation of Form Corrections to Floodable Length Curves.	124
	84. Special Rules concerning Subdivision.	126
	85. Added Weight Method for Flooded Stability.	127
	86. Lost Buoyancy Method for Flooded Stability.	128
	87. Flooded Metacentric Height and Angle of Heel.	129
	88. Intact Buoyancy and Angle of Heel.	130
	89. Stability Requirements.	131
IX.	FLUIDS IN MOTION—FIRST PRINCIPLES	133
	90. Currents and Streams.	133
	91. Dimensions of Measurement Units.	133

CONTENTS

<i>Chapter</i>		<i>Page</i>
	92. Total Energy of Water.	138
	93. Bernoulli's Steady Motion Theorem.	140
	94. Limitations of Bernoulli's Theorem.	143
	95. Venturi Tube and Meter.	143
	96. Venturi Effect with Ships in Restricted Waterways.	144
	97. Magnus Effect and "Circulation"	145
	98. Pitot Tube.	147
	99. Streamline Flow around Vessel in Open Water.	148
	100. Impact of Water.	150
X. FLUIDS IN MOTION—GRAVITY AND VISCOSITY		
	EFFECTS	152
	101. Real Fluids.	152
	102. Viscosity.	152
	103. Effect of Temperature on Viscosity.	153
	104. Kinematic Viscosity.	153
	105. Comparison with Air.	153
	106. Pressure Conditions on Inclined Flat Plate.	154
	107. Flow Pattern at Inclined Flat Plate.	156
	108. Formulae for Pressures on Plates Inclined at Various Angles.	159
	109. Eddy-making Resistance from Blunt-Ended Fittings.	159
	110. Laws of Dimensional Similarity and Comparison.	161
	111. Reynolds Number and Viscous Resistance.	162
	112. Froude Number and Speed/Length Ratio.	163
	113. Combined Viscosity and Gravity Resistance.	164
	114. Froudes' Method and Law of Comparison.	164
	115. The Validity of Froude's Assumptions.	166
	116. Presentation of Form and Resistance Data— Froude's Constants.	166
	117. American Notation for Resistance Data.	168
	118. The Admiralty Constant for Performance and "Circular C".	169
XI. THE PROPERTIES OF WAVES		
	119. Types of Waves—Pressure Waves.	171
	120. Ripples or "Capillary Waves".	171
	121. Waves of Oscillation—the Trochoidal Theory in Deep Water.	172
	122. Dimensions of Actual Ocean Waves.	174
	123. Group Velocity of Wave Trains.	179
	124. Shallow-Water Waves and Waves of Translation.	181

CONTENTS

<i>Chapter</i>	<i>Page</i>
XII. SURFACE FRICTION	182
125. Froude's Experiments.	182
126. Reynolds' Experiments.	184
127. Gebers' Experiments.	185
128. Laminar and Transitional Flow.	187
129. Boundary Layer Flow Conditions.	188
130. "Smooth-Turbulent" Friction Lines.	190
131. Boundary Layer Thickness.	195
132. Effect of Rough Surfaces.	196
133. Comparison of Froude's Constants with Modern Formulations.	199
134. Calculation of Frictional Resistance and Horse-power.	200
135. Temperature Correction for Surface Friction.	201
136. Effect of Fouling.	201
137. Form Effect.	202
138. Frictional Wake.	203
139. Summary of Friction Calculations.	204
XIII. RESIDUAL RESISTANCE AND FORM	206
140. Wave Causation.	206
141. Growth of Wave-Making Resistance.	207
142. Spacing of Wave Systems.	209
143. Residuary Resistance from Standard Series Tests.	212
144. Summary of Taylor Results.	213
145. Modern Improved Forms—General Considerations.	217
146. Midship Section Coefficient and Area.	217
147. Parallel Middle Body and Length of Entry.	218
148. Angle of Entrance.	219
149. Curve of Areas, etc.	220
150. Maier-Form Bow.	221
151. Bulbous Bows.	222
152. Residuary Resistance of Destroyer Types.	223
153. Residuary Resistance of Motor Launches.	223
154. Residuary Resistance of Fast Round-Bottom Launches.	224
155. Resistance of Sailing Vessels.	225
156. Theory of the "Metacentric Shelf".	226
157. Rough Weather Effects.	228
XIV. EXPERIMENTAL TESTING TANKS OR "MODEL BASINS"	229
158. Types and Dimensions.	229
159. The Scaling Up of Tank Results.	232

CONTENTS

<i>Chapter</i>		<i>Page</i>
	224. Measurement of Static Stresses, Strains and Deflections.	368
	225. Dynamic Stresses.	370
	226. Expansion Joints.	371
	227. Composite Construction.	371
XXI.	THE VIBRATION OF SHIPS	373
	228. Modes of Vibration for Uniform Bar.	373
	229. The Vertical Vibration of Ships.	374
	230. The Horizontal Vibration of Ships.	384
	231. Precautions against Vibration.	386
XXII.	LAUNCHING CALCULATIONS	388
	232. General Principles.	388
	233. Launching Curves.	389
	234. Way-End Pressures.	391
	235. Launching Particulars.	393
	236. Releasing Arrangements and Coefficient of Friction.	397
	237. Dynamic Effects.	399
XXIII.	MATERIALS OF CONSTRUCTION	401
	238. Wood <i>v.</i> Steel.	401
	239. Structure and Growth of Timber.	402
	240. Annual Growth Rings.	402
	241. Maturing and Seasoning.	404
	242. Time of Felling and Methods of Conversion.	405
	243. Qualities Required for Shipbuilding Timbers.	406
	244. Plywoods and Laminated Construction.	406
	245. Qualities of Individual Woods.	407
	246. Steels.	413
	247. Aluminium Alloys.	413
	248. Galvanic Corrosion.	415
	249. Precautions against Galvanic Corrosion.	420
	250. Local Corrosion.	422
XXIV.	SOME DESIGN PROBLEMS	425
	251. Tonnage Regulations.	425
	252. Weight Estimates.	428
	253. Special Types.	430
	254. Conclusion.	434

CONTENTS

	<i>Page</i>
APPENDIX	435
255. Polar Moment of Inertia of Propeller.	435
256. Calculation of Propeller Stresses.	437
257. The Troost-Wageningen Propeller Series.	442
NOMINAL INDEX	451
SUBJECT INDEX AND GLOSSARY	453

133 LINE DIAGRAMS AND 65 TABLES

LIST OF ABBREVIATIONS FOR NAMES OF
TECHNICAL SOCIETIES, ETC.

- A.T.T.C.—American Towing Tank Conference.
- B.S.R.A.—The British Shipbuilding Research Association.
- I.E.S.S.—Transactions of the Institution of Engineers and Shipbuilders in Scotland.
- I.N.A.—Transactions of the Institution of Naval Architects.
- N.A.C.A.—National Advisory Committee for Aeronautics, U.S.A.
- N.E.C.—Transactions of the North-East Coast Institution of Engineers and Shipbuilders.
- N.P.L.—The National Physical Laboratory, Teddington.
- S.N.A. and M.E.—Transactions of the Society of Naval Architects and Marine Engineers.
