Preface to First Edition . . . . .	5
Preface to Second Edition . . . . .	6
Nomenclature . . . . .	7
Introduction . . . . .	9

## Chapter 1. FATIGUE ASSESSMENT OF STRUCTURAL ELEMENTS

UNDER IN-PHASE AND OUT-OF-PHASE LOADINGS . . . . .	10
1.1. Background . . . . .	10
1.2. Uniaxial in-phase stress conditions . . . . .	14
1.2.1. Constant amplitude axial force and bending moment . . . . .	14
1.2.2. Random amplitude axial force and bending moment . . . . .	20
1.3. Combined in-phase stress in bending, torsion and tension-compression . . . . .	24
1.3.1. Bending and torsion . . . . .	24
1.3.2. Bending, torsion and tension-compression . . . . .	30
1.4. General state of stress with components of equal frequency . . . . .	35
1.4.1. In-phase stress conditions . . . . .	35
1.4.2. Functional of fatigue safety of structural elements . . . . .	41
1.4.3. Strain power of elastic distortion . . . . .	49
1.4.4. Probability of fatigue failure . . . . .	53

## Chapter 2. FATIGUE ASSESSMENT OF STRUCTURAL ELEMENTS

UNDER PERIODIC AND STATIONARY RANDOM LOADINGS . . . . .	64
2.1. Uniaxial state of cyclic stress . . . . .	64
2.1.1. Equivalent stress under periodic loading . . . . .	64
2.1.2. Equivalent stress under random loading . . . . .	70
2.1.3. Fatigue design criteria at periodic loading . . . . .	77
2.1.4. Fatigue design criteria at random loading . . . . .	79
2.2. Uniaxial state of combined cyclic stress . . . . .	89
2.2.1. Equivalent state of stress under periodic loading . . . . .	89
2.2.2. Equivalent state of stress under random loading . . . . .	94
2.2.3. Fatigue design criteria at periodic loading . . . . .	95
2.2.4. Fatigue design criteria at random loading . . . . .	98
2.3. Combined cyclic stress in bending, torsion and tension-compression . . . . .	100
2.3.1. Equivalent states of stress . . . . .	100
2.3.2. Fatigue design criteria . . . . .	104
2.4. General state of cyclic stress . . . . .	107
2.5. Reduced stress . . . . .	112

## Chapter 3. FATIGUE ASSESSMENT OF STRUCTURAL ELEMENTS

UNDER VARIABLE LOADING CONDITIONS . . . . .	116
3.1. Sequence of uniaxial states of periodic stress . . . . .	116
3.2. Sequence of uniaxial states of random stress . . . . .	127
3.3. Sequence of complex states of periodic stress in bending, torsion and tension-compression . . . . .	134
3.4. Sequence of complex states of random stress in bending, torsion and tension-compression . . . . .	141
3.5. Sequence of general states of periodic stress . . . . .	144
3.5.1. Equivalent state of stress . . . . .	144
3.5.2. Equivalent stress . . . . .	148

3.6. Sequence of general states of random stress. . . . .	154
3.6.1. Equivalent state of stress. . . . .	154
3.6.2. Equivalent stress. . . . .	156
3.6.3. Effective stress. . . . .	160
<b>Chapter 4. FATIGUE ASSESSMENT OF STRUCTURAL ELEMENTS UNDER STATIC-DYNAMIC LOADING CONDITIONS . . . . .</b>	<b>168</b>
4.1. Introduction. . . . .	168
4.2. Formulation of the problem. . . . .	170
4.3. Average-distortion-energy strength hypothesis. . . . .	171
4.4. Reduced stress under static-periodic loading conditions. . . . .	172
4.5. Reduced random stress under stationary static-dynamic loading conditions. . . . .	176
4.6. Criteria in design for infinite fatigue life under multiaxial static-dynamic loading. . . . .	183
4.7. Criteria in design for finite fatigue life under multiaxial static-dynamic loading. . . . .	191
Conclusions. . . . .	203
References. . . . .	206

## Appendices

A. Equivalent states of stress under aperiodic loading conditions. . . . .	211
B. Equivalent states of stress under nonstationary random loading conditions . . . . .	214
Summary in English. . . . .	217
Summary in Polish . . . . .	218
Content in Polish. . . . .	219
