1	Introduction	1
---	--------------------	---

Part I Fundamental Principles

2	Skywave Propagation	45
3	System Characteristics	121
4	Conventional Processing	215
5	Surface-Wave Radar	323

Part II Signal Description

6	Wave-Interference Model	433
7	Statistical Signal Model	475
8	HF Channel Simulator	523
9	Interference Cancellation Analysis	555

Part III Processing Techniques

10	Adaptive Beamforming	583
11	Space-Time Adaptive Processing	651
12	GLRT Detection Schemes	707
13	Blind Waveform Estimation	771

Part IV Appendixes and Bibliography

A	Sample ACS Distribution	845
B	Space-Time Separability	851
C	Modal Decomposition	853
	Bibliography	855
	Index	901
