

# CONTENTS

## CHAPTER I

|   | PAGE |
|---|------|
| The embryo yachtsman—learning the rudiments of rowing and sailing in a hired boat—Dinghy sailing—First lesson in his own boat—A capsize—Righting the boat again—A larger sailing boat, and how to handle her—Her cost—Camping and coastal cruising—What to practise and study . | 1    |

## CHAPTER II

|   |    |
|---|----|
| Building one's own boat—A study of "lines" and what they mean—Construction and specification of boat to be built—Tools, materials, and timber required—Laying off, making and erecting the moulds—Building—Spars, rigging, and sails—Painting—Launching . . . . | 19 |
|---|----|

## CHAPTER III

|   |    |
|---|----|
| Sailing the new boat—How to get under way—Laying to—Picking up a man overboard—Picking up moorings—Anchoring—Mooring—Giving a sheer to a boat at anchor . . . . . | 57 |
|---|----|

## CHAPTER IV

|   |    |
|---|----|
| Yacht rigging, various component parts of—Flax, hemp, and cotton—Strength and weight of hemp ropes—Wire ropes, their strength and weight—Chains, their strength and weight—Various knots, seizings, and lashings—Splicing hemp ropes—Splicing wire ropes—Ornamental knots—Sundry ornamental work—Blocks and tackles . . . . . | 72 |
|---|----|

## CHAPTER V

|  |     |
|--|-----|
| Seamanship : A yacht owner should become a practical yachtsman—Setting the sails, mainsail, topsail, jib, foresail—Getting under way—General remarks on seamanship . . . . . | 121 |
|--|-----|

## CHAPTER VI

|  |     |
|--|-----|
| Seamanship : Handling a yacht under way—Steering : Steering on a reach—Looking out for puffs—Steering before the wind—Steering on a broad reach in a heavy sea—The modern yacht in a heavy sea—Steering to windward in a heavy sea—Handling a jib-topsail—Setting a jib-topsail—Stowing a jib-topsail—Setting a Yankee jib-topsail . . . . . | 134 |
|--|-----|

## CHAPTER VII

|   |             |
|---|-------------|
| Seamanship: The duties of the crew when sailing—Taking in spinnaker—<br>Gybing—Tacking—Lowering sails . . . . . | PAGE<br>154 |
|---|-------------|

## CHAPTER VIII

|  |     |
|--|-----|
| Theory of tides: Rules governing them—Springs and Neaps—Various terms<br>used in connection with tides—Tide Tables and their use—Tide diagrams<br>—Finding the depth of water at any time at a given place—When a yacht<br>aground will float again—Tidal streams—Finding their direction at any<br>time—Use and good effects of tides . . . . . | 172 |
|--|-----|

## CHAPTER IX

|   |     |
|---|-----|
| Sound signals used at sea and their meanings—Distinctive lights and<br>signals carried by various craft—Signals of distress—British buoyage<br>system—French buoyage system—Dutch buoyage system—Charts and<br>their uses—Mercator's projection—Bearings, tides, and currents—Lead-<br>line and sounding machines—Logs—Look-out . . . . . | 184 |
|---|-----|

## CHAPTER X

|  |     |
|--|-----|
| The rules of yacht racing—Y.R.A. and International Yacht Racing Union<br>Rules—Management of races—Sailing rules—The rule of right of way—<br>overtaking, etc., explained, with diagrams—Protests—Measurement<br>rules—The International Rule of Measurement—Cabin fittings—Time<br>Allowance Scales . . . . . | 203 |
|--|-----|

## CHAPTER XI

|  |     |
|--|-----|
| Measuring a yacht to find her rating—How to reduce the rating when she is<br>over the limit of her class . . . . . | 253 |
|--|-----|

## CHAPTER XII

|  |     |
|--|-----|
| Racing: A typical yacht race described in detail for purpose of instruction<br>in sailing—Handling a yacht in a race—The start . . . . . | 265 |
|--|-----|

## CHAPTER XIII

|   |     |
|---|-----|
| Racing: A typical yacht race (continued)—On the reach—The turn to wind-<br>ward—The run—Rounding the mark—A quartering wind and a luffing<br>match—Reasons for luffing tactics—On a close reach—Personal comfort. . . . . | 278 |
|---|-----|

## CHAPTER XIV

|  |     |
|--|-----|
| Racing: A typical yacht race (continued)—More turning to windward—<br>Cross tacking—An exciting finish . . . . . | 305 |
|--|-----|

# CONTENTS

vii

## CHAPTER XV

|   |             |
|---|-------------|
| Modern comforts in yachting—Lighting of yachts below—Navigation lights—Search lights—Lifebuoy lights—Heating of yachts—Ventilation—Cold storage . . . . . | PAGE<br>316 |
|---|-------------|

## CHAPTER XVI

|  |     |
|--|-----|
| Motor Dinghy—Two-stroke motors—Ignition—Fitting a motor into a sailing boat—Auxiliary yachts, their advantages—Mollihawk III—Yachts' tenders—Dangers of petrol—Safety systems—Costs of running motor craft—Inland motor yachting—Hydroplanes—High powered motors for large yachts—Diesel type of motor . . . . . | 322 |
|--|-----|

## CHAPTER XVII

|  |     |
|--|-----|
| Buying a yacht—Surveys—Completing a purchase—Admiralty warrants—Probable costs—Changing a name—Hiring a yacht, form of agreement—Insurance of yachts—Various clauses in policies and their meanings—East Coast Mutual Assurance—What to do in cases of damage and loss . . . . . | 349 |
|--|-----|

## CHAPTER XVIII

|  |     |
|--|-----|
| Yacht designing: Elementary yacht designing on the system of G. L. Watson—Definitions of displacement, centre of gravity, centre of buoyancy—Principle of stability—Calculation of areas and capacities—Simpson's Rule explained—Finding centres of planes and bodies—Centre of lateral resistance—Homogeneous bodies—Centre of gravity of yacht's hull and ballast—Shifting weights, adding weight—Centre of effort of sails—Rules for finding centre of gravity and centre of buoyancy . . . . . | 374 |
|--|-----|

## CHAPTER XIX

|  |     |
|--|-----|
| Yacht designing: Drawing the lines of a yacht, the profile; half-breadth plan; body plan; diagonals—Yachtsman to make his own drawings, checking and fairing the lines—Care as to intersections of water lines, buttocks, frame sections and diagonals—Drawing Materials . . . . . | 393 |
|--|-----|

## CHAPTER XX

|   |     |
|---|-----|
| Yacht designing: Applying the calculations of displacement and centre of buoyancy—Curve of sectional areas—G. L. Watson's system by four Tables . . . . . | 405 |
|---|-----|

## CHAPTER XXI

|  |     |
|--|-----|
| Yacht designing: Calculations of centre of buoyancy and displacement applied to a 7-metre racing yacht . . . . . | 413 |
|--|-----|

## CHAPTER XXII

|   |     |
|---|-----|
| Yacht designing: Remarks on stability—Wind pressure—A practical method of finding the true measure of the stability of a yacht—The meta-centre—Metacentric method of little practical use . . . . . | 422 |
|---|-----|

## CHAPTER XXIII

|  |             |
|--|-------------|
| Ice yachts—Peculiar handling of—Real and apparent wind—How it is that yachts generally can beat to windward—Sand boats: their antiquity—Racing in Belgium—Sailing railway trolleys . . . . . | PAGE<br>430 |
|--|-------------|

## CHAPTER XXIV

|   |     |
|---|-----|
| Sea fishing—Fishing from pier and rocks—Hand-lining from a boat at anchor—System of taking marks at sea—Cross marks—Picking up an object lost overboard—Placing the boat at anchor—Whiffing or railing—Setting pots, long lines, floating trots and trammels—Trawling—The Beam trawl—The Otter trawl—Shrimp trawling and dredging—Seining—Sand-eel seining—Fish spearing—Fishing amongst rocks and sands at low water—Catching lobsters in their burrows—Razor fishing with salt and wire—Bisque soup . . . . . | 438 |
|---|-----|

## CHAPTER XXV

|   |     |
|---|-----|
| A history of the pastime of yachting—Variety of types—Cod's head and mackerel tail—Origin of old tonnage rules—Capacity—Builders' measurement and Thames measurement—The schooner America's visit in 1851—Plank-on-edge type—The Jullanar—Broad keels and outside lead—Development of extreme plank-on-edge—New era of more moderate vessels under Length and Sail Area Rule—Vessels of extremely light displacement—One-design classes—Evolution of type under first and second linear-rating rules—The scantling question—Handicap racing and modern cruising yachts—The Magdalen type—Lord Dunraven's Audrey referred to—The coming of the International Rule and yachts built under it—Modern sail plans—General comparison of yachts of different periods, 1863-1911 . . . . . | 463 |
|---|-----|

## CHAPTER XXVI

|  |     |
|--|-----|
| <i>Remarks on cruising—Yachting localities and where to keep a boat—The Cruising Association and its work useful to small-boat men—The cost of small yachts—Seaworthy type—Question of rig—The hull—Methods of reefing—Treatment of sails—Laying to—Sea anchor—Handling a yacht in bad weather—The dinghy—Lamps—The use of the motor—Anchors and chains—Paid hands, their wages, clothes, and the general cost of running a yacht—Six hands—Three hands—Full crew—Short-handed with amateurs at less cost—Racing money—Plans of a 6-ton cruiser and a 15-ton cruiser . . . . .</i> | 501 |
|--|-----|

## CHAPTER XXVII

|  |     |
|--|-----|
| <i>Altered conditions of yachting after the war—Increase of cost—Reduction of Sail Area necessary to meet increased cost in 1920-21—The new International Rating Rule, 1920, and Length and Sail Area Measurement—Table of Measurements of a 7-metre yacht, showing how the Rating is calculated by the New International Rule—An exposition of the Rule showing it to be Length and Sail Area only—An approximate method of finding any Yacht's Rating by the 1920 Rule—Table of possible measurements for 6-metre Yachts by New International Rule . . . . .</i> | 545 |
|--|-----|

|                 |     |
|-----------------|-----|
| INDEX . . . . . | 559 |
|-----------------|-----|
