About the Authors	xiii
Foreword to the First Edition by Zach Shelby	xv
Foreword to the First Edition by Geoff Mulligan	xvii
Foreword to the Second Edition by Geoff Mulligan	xix
Preface	xxi
Acknowledgments	xxvii

PART 1 THE EVOLVING IOT LANDSCAPE

CHAPTER 1	Why the Internet of Things?	3
CHAPTER 2	Origins and IoT Landscape	9
2.1	Introduction	9
2.2	Evolving to an Internet of Things	10
2.2.1	A brief background	11
2.2.2	A simple enterprise IoT solution overview	12
2.2.3	The Internet of Things ahead	13
2.3	IoT in a Global Context	16
2.3.1	Game changers	18
2.3.2	General technology and scientific trends	19
2.3.3	Trends in information and communications technologies	19
2.3.4	Expected capabilities	22
2.3.5	Implications for IoT	24
2.3.6	Barriers and concerns	25
2.4	A Use Case Example	26
2.5	A Shift in Mindset	29
CHAPTER 3	IoT – A Business Perspective	31
3.1	Introduction	31
3.1.1	Information marketplaces	31
3.2	Definitions	32
3.2.1	Global value chains	32
3.2.2	Ecosystems vs. value chains	33
3.2.3	Industrial structure	33
3.3	Value Chains Overview	33
3.4	IoT Value Chain Example	34
3.5	An Emerging Industrial Structure for IoT	35
3.5.1	The Information-Driven Global Value Chain	38
3.6	The International-Driven Global Value Chain and Global Information Monopolies	42

3.7	Business Model Innovation in IoT	43
3.7.1	Current examples	44
3.7.2	Business to Business models	44
3.7.3	Data analytics business models	44
3.7.4	New data marketplaces models	44
3.7.5	SLA security integration	45
3.8	Conclusions	47
CHAPTER 4	An Architecture Perspective	49
4.1	Building an Architecture	49
4.2	Requirements and Main Design Principles	51
4.3	An IoT Architecture Outline	55
4.4	Standards Considerations	60

PART 2 IOT TECHNOLOGIES AND ARCHITECTURES

CHAPTER 5	Technology Fundamentals	67
5.1	Devices and Gateways	68
5.1.1	Introduction	68
5.1.2	Basic devices	71
5.1.3	Gateways	73
5.1.4	Advanced devices	75
5.1.5	Summary and vision	76
5.2	Local and Wide Area Networking	77
5.2.1	The need for networking	77
5.2.2	Wide Area Networking	81
5.2.3	Low-Power Wide Area Networks	83
5.2.4	Local Area Networking	87
5.3	Machine Intelligence	91
5.3.1	The role of Machine Intelligence in IoT	91
5.3.2	Machine Intelligence overview	94
5.3.3	Considerations when using MI for IoT data	96
5.3.4	A framework of MI for IoT	98
5.3.5	Industrial Internet Analytics Framework	101
5.3.6	Conclusions	103
5.4	Distributed Cloud and Edge Computing	103
5.4.1	A new software delivery model	103
5.4.2	Cloud fundamentals	104
5.4.3	Computing at the edge	107
5.4.4	Considerations and conclusions	110
5.5	Data Management	111
5.5.1	Introduction	111
5.5.2	Managing IoT data flow	112
5.5.3	IoT data considerations	115
5.5.4	Conclusions	116

5.6	Business Processes in IoT	116
5.6.1	Introduction	116
5.6.2	IoT integration with enterprise systems	118
5.6.3	Distributed business processes in IoT	120
5.6.4	Considerations	122
5.6.5	Conclusions	123
5.7	Distributed Ledgers and Applications	123
5.7.1	DLT, IoT, and Data Ownership	125
CHAPTER 6	Security	127
6.1	Introduction	127
6.2	Basic Principles	128
6.2.1	Encryption	129
6.2.2	Authentication	131
6.3	Threats to IoT Systems	132
6.3.1	Denial of Service (DoS) Attacks	132
6.3.2	Sybil attacks	133
6.3.3	Privacy attacks	133
6.3.4	“Hole” attacks	134
6.3.5	Physical attacks	134
6.4	Mitigating Threats to IoT Applications	135
6.4.1	Application layer and physical attacks	135
6.4.2	Transport layer	136
6.4.3	Network layer	136
6.4.4	Data Link/Medium Access Control layer	136
6.4.5	Physical layer	137
6.5	Security in Architectures and Standards	137
6.5.1	IETF	137
6.5.2	3GPP and low-power Wide Area Networks	138
6.6	Security for a Safe IoT	139
6.6.1	Safety in industrial automation and robotics	139
6.6.2	Safety in automotive systems	140
6.6.3	Safety in Smart Cities	140
6.7	Privacy in IoT	141
6.8	Future Developments in Security	141
CHAPTER 7	Architecture and State-of-the-Art	143
7.1	Introduction	143
7.2	ITU-T	144
7.3	IETF	146
7.3.1	Introduction	146
7.3.2	IETF IoT-related Working Groups	146
7.3.3	IETF fragments of an architecture	150
7.4	OMA	158
7.5	IoT-A and IIRA	163

7.6	RAMI 4.0	163
7.7	W3C	165
7.8	OGC	168
7.9	GS1 Architecture and Technologies	170
7.9.1	GS1 Identify	170
7.9.2	GS1 Capture	171
7.9.3	GS1 Share	173
7.9.4	EPCIS architecture and technologies	174
7.10	Other Relevant State-of-the-Art	175
7.10.1	oneM2M	175
7.10.2	OCF	176
7.10.3	IEEE	176
7.10.4	IEC/ISO: ISO/IEC JTC 1/WG 10/SC 41	177
7.10.5	AIOTI	177
7.10.6	NIST CPS	178
7.11	Conclusions	179
CHAPTER 8	Architecture Reference Model	181
8.1	Introduction	181
8.2	Reference Model and Architecture	182
8.3	IoT Reference Model	184
8.3.1	IoT Domain Model	184
8.3.2	Information model	193
8.3.3	Functional model	198
8.3.4	Communication model	202
8.3.5	Safety, privacy, trust, security model	202
8.4	IoT Reference Architecture	204
8.5	Functional View	205
8.5.1	Device and Application Functional Group	205
8.5.2	Communication Functional Group	205
8.5.3	IoT Service Functional Group	207
8.5.4	Virtual Entity Functional Group	208
8.5.5	IoT Process Management Functional Group	209
8.5.6	Service Organization Functional Group	209
8.5.7	Security Functional Group	210
8.5.8	Management Functional Group	210
8.6	Information View	211
8.6.1	Information description	211
8.6.2	Information flow and lifecycle	211
8.6.3	Information handling	213
8.7	Deployment and Operational View	218
8.8	Other Relevant Architectural Views	222
8.9	Other Reference Models and Architectures	222
8.9.1	Industrial Internet Reference Architecture	223
8.10	Best Practices	233

8.11	Conclusions	234
CHAPTER 9	Designing the Internet of Things for the Real World	235
9.1	Introduction	235
9.2	Technical Design Constraints – Hardware Is Popular Again	235
9.2.1	Devices and networks	236
9.3	Data Representation and Visualization	239
9.4	Interaction and Remote Control	239

PART 3 IOT USE CASES

CHAPTER 10	Asset Management	243
10.1	Introduction	243
10.2	Expected Benefits	244
10.3	e-Maintenance in the IoT Era	244
10.4	Hazardous Goods Management in the IoT Era	246
10.5	Conclusions	248
CHAPTER 11	Industrial Automation	249
11.1	SOA-Based Device Integration	249
11.2	SOCRADES: Realizing the Enterprise Integrated Web of Things	252
11.3	IMC-AESOP: From the Web of Things to the Cloud of Things	254
11.4	Conclusions	256
CHAPTER 12	Smart Grid	257
12.1	Introduction	257
12.2	Smart Metering	260
12.3	Smart House	262
12.4	Smart Grid City	264
12.5	Conclusions	268
CHAPTER 13	Commercial Building Automation	269
13.1	Introduction	269
13.2	Case Study: Phase One – Commercial Building Automation Today	270
13.2.1	Background	270
13.2.2	Technology overview	271
13.2.3	Value chain	273
13.3	Case Study: Phase Two – Commercial Building Automation in the Future	273
13.3.1	Evolution of commercial building automation	273
13.3.2	Background	274
13.3.3	Technology overview	276
13.3.4	Evolved value chain for commercial building automation	277
CHAPTER 14	Smart Cities	279
14.1	Introduction – What Is a Smart City?	279
14.2	Smart Cities – A Technical Perspective	279
14.3	IoT Data Supply Chains	281
14.4	IoT Data and Context Management in Smart Cities	282

14.5	ETSI ISC Context Information Management	283
14.6	Smart Cities – A Reference Architecture	284
14.7	Smart Cities – Smart Parking	286
CHAPTER 15	Participatory Sensing	289
15.1	Introduction	289
15.2	Roles, Actors, Engagement	290
15.2.1	Collective design and investigation	290
15.2.2	Public contribution	290
15.2.3	Personal use and reflection	290
15.3	Participatory Sensing Process	290
15.4	Technology Overview	291
15.5	An Early Scenario	293
15.6	Recent Trends	294
15.6.1	Citizen journalism	294
15.6.2	Passive participation	294
15.6.3	Social Sensing	295
15.7	A Modern Example	295
15.8	Conclusions	297
CHAPTER 16	Autonomous Vehicles and Systems of Cyber-Physical Systems	299
16.1	Introduction	299
16.2	Autonomous Cars	300
16.2.1	A very brief history of autonomous cars	300
16.2.2	Enabling technologies	300
16.2.3	Regulation, governance, and ethics	301
16.2.4	Other autonomous passenger vehicles	301
16.3	Other Autonomous Systems	302
16.3.1	Autonomous rail	302
16.3.2	Unmanned aerial systems	302
16.3.3	Unmanned Autonomous Underwater Vehicles and Systems	303
16.4	Intelligent Infrastructure	303
16.5	Convergence and Systems of Cyber-Physical Systems	303
16.6	Cyber-Physical Systems Challenges and Opportunities	304
CHAPTER 17	Logistics	307
17.1	Introduction	307
17.2	Roles and Actors	309
17.3	Technology Overview	311
17.3.1	Identification of the Things	311
17.3.2	Main technologies	311
17.4	Example Scenario – Food Transport	313
17.5	Conclusions	316
CHAPTER 18	Conclusions and Looking Ahead	317

Appendix A	ETSI M2M	321
A.1	Introduction	321
	A.1.1 ETSI M2M high-level architecture	321
	A.1.2 ETSI M2M Service Capabilities	324
	A.1.3 ETSI M2M interfaces	327
	A.1.4 ETSI M2M resource management	327
	Abbreviations	329
	Bibliography	339
	Index	349
