

CONTENTS

1	SOUND	6
1.1	Physical Parameters of Sound	6
1.2	Sonar equation	11
1.3	Attenuation and Interference	13
1.4	Calculating the Speed of Sound	21
1.5	Wave Propagation in Solids	26
1.6	Sound Velocity in Sediment	29
1.7	Ray Path and Signal Strength	31
1.8	Detection	38
1.9	Frequency	41
1.10	Pulse Width / length	42
1.11	Transducers	44
1.12	Separate Source / Receiver Systems	49
1.13	Speed of Sound or TS-Probes	52
1.14	Doppler Effect	53
1.15	Distance measurement with sound	54
2	SINGLEBEAM ECHO SOUNDER	57
2.1	Construction	57
2.2	Parametric Echo sounder	58
2.3	Singlebeam Installation	59
2.4	Calibration: Bundle Measurement	60
2.5	Calibration: Bar Check	61
2.6	Settings	62
2.7	Beam Characteristics	66
2.8	Interpretation of Records	68
2.9	Manual Processing of Echo Sounder Surveys	70
3	MULTICHANNEL ECHO SOUNDER	72
3.1	Principle	72
3.2	System Design	72
3.3	Practical Considerations	72
3.4	Data Interpretation	73
4	SCANNING SONAR / PROFILER	75
4.1	Principle and Applications	75
4.2	Scanning Profiler Installation	78
4.3	Using a Scanning Profiler	79
4.4	Interpretation	80
5	MULTI-BEAM ECHO SOUNDERS	84
5.1	General	84
5.2	Multibeam Installation	86
5.3	Calibration of Swath Sounders using the Patch Test	87
5.4	Settings	92
5.5	Multibeam Practical considerations	98
6	SIDE SCAN SONAR	105
6.1	Introduction	106
6.2	Theory of Operation	106
6.3	Installation	110
6.4	Calibration	113
6.5	Survey preparations	115
6.6	Survey Specifications and Planning	120
6.7	Practical Operations	122
6.8	Interpretation of the Sonar Image	127
6.9	Processing	130
7	AIRBORNE LASER SWATH SOUNDERS (LIDAR)	134
7.1	General	134
7.2	Applications	135
7.3	System Design	135
7.4	Data Interpretation	137
7.5	ALB Data Presentations	138

8	MOBILE LASER SCANNER	140
8.1	General	140
8.2	Applications	140
8.3	System Design	141
8.4	Data Interpretation	141
9	REMOTE SENSING BATHYMETRY	144
9.1	Gravity anomaly based bathymetry	144
9.2	Hydrodynamic effect based bathymetry	145
10	OTHER DEPTH ACQUISITION TECHNIQUES	148
10.1	Non-acoustic inspection techniques	148
10.2	Wire and bar sweeps.	149
10.3	Underwater Cameras	150
10.4	Video overlay systems	151
11	WAVES AND CURRENT MEASUREMENT	153
11.1	Introduction	153
11.2	Instruments that measure the instantaneous water level	153
11.3	Instruments that measure wave activity	156
11.4	Current Measurement	157
11.5	OTT-Elmar Propeller Current Profiler	158
11.6	Acoustic Doppler (Current) Profiler (ADCP)	161
12	SOIL SAMPLING	171
12.1	Soil type	171
12.2	Coring systems	172
12.3	Drilling	180
12.4	Grab samplers	181
13	IN-SITU TESTING SYSTEMS	183
13.1	Cone penetration tests	183
13.2	Vane shear test	185
13.3	T-bar and ball penetration test	186
13.4	Laboratory testing	186
13.5	Electric resistivity systems	186
13.6	Seabed classification systems	188
14	SEDIMENT	189
14.1	Sediment Classification	189
14.2	Sediment transport Measurement	189
15	SHALLOW SEISMIC SYSTEMS / SUB BOTTOM PROFILER	195
15.1	General	195
15.2	Theory of Operation	197
15.3	The Sub-bottom Profile	199
15.4	Installation	200
15.5	Signal Processing and Presentation	203
16	MAGNETOMETER	209
16.1	General	209
16.2	Applications	211
16.3	Installation	213
16.4	Limitations	214
16.5	Processing	215
17	PIPELINE AND CABLE TRACKING SYSTEMS	217
17.1	General	217
17.2	Installation	220
17.3	Interpretation	221
